The Department of Safety and Risk Management recognizes that the university's greatest assets are the individuals making up our university community. It is the responsibility of the Department of Safety and Risk Management to provide the necessary tools to our community to meet our vision of exemplary service and success. Our responsibilities include:

Health and Safety
- Develop and manage the TAMUC Environmental Health and Safety related programs and procedures
- Assist with emergency preparedness planning for major disasters and coordinate university plans with the local community and agencies
- Oversight and management of the university's laboratory safety programs
- Management of the university's Fire and Life Safety program

Environmental
- Environmental Protection
- Manage the university's ground water program

Risk Management
- Procurement of insurance for all university departments and special events
- Automobile accident, property damage, and claims management

Transportation Fleet and Fuel
- Manage the university inventory of automobiles, busses and carts
- Manage the university fleet of passenger buses and shuttles

University Projects
- Manage the administrative and operational processes related to projects and work orders
- Liaison between the university and third party contractor for facilities and construction
