The Academic Success Center (ASC) provides academic resources to help each student reach his or her intellectual potential and achieve academic success. The ASC offers face-to-face and online tutoring, study skills and time management training, as well as the Supplemental Instruction (SI) program. Faculty teaching core level undergraduate courses can learn more about the SI program and access the Instructor Handbook on the Instructor Information on SI Leadership page. Faculty can direct their students to the Resources page that provides links to resources for all students around campus and on the web (e.g., time management, study strategies, help with subject areas), as well as resources specifically for nursing students. Visit the Academic Success Center . . . where minds meet.
