Residency requirements are designed to promote collaboration between students and professors as well as promote research practices among doctoral students. Residency is not just a requirement checklist but an opportunity to experience a scholarly research environment and develop skills to complete the dissertation.

This conference list is not all-inclusive. The student should work with their curriculum advisor to determine conferences most appropriate for their research interest.

Residency requirements include a total of 3 conferences. One of these must be a national conference.

At least one of the conferences must be a state level TCPEA meeting or the national NCPEA meeting. The fall TCPEA/GRE and the TASB convention are held concurrently and can actually serve as both the research conference and a state conference if the student attends the entire program. If you present at the GRE session you would also have completed the presentation requirement.

The research strand may be completed with a presentation of the student’s research. Presenting at the TCPEA Graduate Research Exchange (GRE), SERA Conference, Pathways Conference or TAMUC Annual Research Symposium will satisfy the “research strand” of residency requirements.
