An interactive music classroom with students actively participating is just the starting point. Student learning is strengthened when their brain is engaged in thinking about and verbalizing their experiences and their learning.

Assessment is an ongoing part of the process. This workshop will utilize a variety of techniques to engage students’ thinking and elicit meaningful responses. As teachers, we can guide students beyond the activity into their growing understanding and increasing capabilities as music makers. You are encouraged to bring a laptop and/or tablet.

3 Hours of CPE Credit is available for TMEA members. If membership is not current, you may pay onsite with credit/debit card.

This Session is offered free of charge.

Beaver Technology Center, 3232 March Ln, Garland, TX 75042
Workshop Session 9 - 12:00
Registration 8:30

To help us plan for refreshments, please RSVP to Susan Elliott.
