- Prepare diligently for all exams
- Complete all exams on time
- Follow the policies set forth in this syllabus, in class, and as specified by the university

Students must not fall behind in the class, as it will be very difficult to catch up. Accounting is cumulative by nature. **This course requires extensive reading, studying, and time spent working homework problems. Summer term courses move at an accelerated rate.** Students will be held responsible for all concepts presented in the textbook, as well as in the homework, unless specifically instructed to omit the material.

Students are expected to adhere to all rules and standards set forth in this syllabus. The instructor reserves the right to modify or change this syllabus at any time. Students are expected to adhere to the academic honesty standards promulgated by Texas A & M University-Commerce. There are no acceptable reasons for violating any of the stated rules and conduct standards published by the university or contained in this syllabus.

EXAMINATIONS

Exams in total count 80% of the final grade. Two (2) examinations (mid-term and final) will be given during the semester via My Accounting Lab Plus. Each exam will count 200 points. The examinations will be timed, and will be open for the window of time specified in the schedule. Exams will include questions based on understanding concepts and solving problems. Students must complete all exams within the dates and times of the testing windows given. There will be no makeup exams given.

HOMEWORK

Homework assignments count 20% of the final grade. Students must complete all homework before taking the exam over the material; no homework will be accepted after the final due date listed. Do not use the “guess and check” method for submitting homework. Students must be able to work the homework in order to pass the exams. Homework problems are to be completed in My Accounting Lab Plus; students will receive automatic feedback and will be able to correct answers and re-submit up to three times. Take the opportunity to learn from the feedback. This will increase comprehension of the course and prepare students for the exams. Students must be able to work the homework in order to pass the exams.

I strongly suggest that students print a blank copy of the homework and work each problem manually before submitting answers. This will provide the student with study material for later examinations.

OPTIONAL ONLINE STUDY PLAN

My Accounting Lab offers a Study Plan for each chapter, complete with Pre-Tests and Post-Tests. These tools are available for students to take an unlimited number of times. There is no penalty for accessing these study items, as grades for these study tools will **NOT BE COUNTED TOWARD YOUR FINAL GRADE**; rather, they should be used as self-assessment tools by the students in preparing for the exams. Items do not count toward the final grade. These can greatly increase your understanding of the course material and prepare you for the exams. To access the Pre-Tests and Post-Tests, along with the Study Plan, click on the Study Plan link in My Accounting Lab.
