CSCI 530 02W: Operating Systems
Summer II 2012 (Web-based)
TENTATIVE SYLLABUS (subject to change at any time)

INSTRUCTOR:

Dr. Ray Maleh
Adjunct Professor, Department of Computer Science
Office: Virtual Office on E-college
Email: Ray.Maleh@tamuc.edu
Office Hours: Virtual Office, questions will be answered within one business day.

CLASS MEETING TIMES:

July 9, 2012 - Aug. 9, 2012

TEXTBOOK:

COURSE DESCRIPTION:

General theory and concepts behind operating system design are discussed in this course. Topics include operating system structures, memory management, process scheduling, process synchronization and communication, deadlocks, and case studies of other commercially available operating systems.

STUDENT LEARNING OUTCOMES:

1. Understand the concepts, structures, and mechanisms of operating systems.
2. Understand memory management, virtual memory, swapping, paging algorithms, segmentation, and clock paging policies.
3. Understand multiprogramming and multiuser capabilities, and how operating systems evolved.
4. Understand process management, process states and process and thread structures and concepts.
5. Understand concurrent processes and associated deadlock prevention, avoidance, detection, recovery methods, and the use of semaphores.
6. Learn specific design decisions and architectures used in modern operating systems.
METHOD OF EVALUATION (Tentative):

Your grade in the course will be calculated as follows:

| Mini-Projects (4x, 20% each) | 80 % |
| Final Exam | 20 % |

Four homework assignments/mini projects will be assigned. The assignments will typically consist of one or two hand calculations as well as a programming component which will ask you to simulate some operating system procedures. The code for these assignments must be in C, C++, or Java (I assume everyone is familiar with at least one of these languages). For the programming components, please include the output of your program in your homework and provide your source code separately. The due dates of the homework assignments will be announced on e-College. You will have one week to complete each assignment. Homework assignments are to be typed and submitted on e-College in some sort of text file (raw text or Microsoft Word). Multiple files (including source files) are to be submitted separately and should not be encapsulated into any sort of compressed file or folder (e.g. zip or rar). A drop box will be created for each assignment. This drop box will be programmed to not accept any late submissions.

A final exam will be administered online and will consist of multiple choice and true/false questions. It will be administered on August 9, 2012. The exam is “open-book” and you are allowed to utilize any non-human reference. However, if you have to spend a lot of time looking up information, then you will find that you will have a harder time finishing the exam within the time limit. Also, you are not permitted to collaborate with other students in the class. I will use fairly sophisticated statistical techniques to evaluate whether there is a high probability of cheating when I come across two or more exams with many similar incorrect answers.

Your final letter grade will be determined as follows:

- A - total number of points ≥ 89.5
- B - 79.5 ≤ total number of points < 89.5
- C - 69.5 ≤ total number of points < 79.5
- D - 59.5 ≤ total number of points < 69.5
- F - total number of points < 59.5

I reserve the right to curve the grades in the course; however, for a given raw average, you will at least earn the grade letter shown above (if not better). As you will notice, I have already incorporated a standard rounding scheme into the schedule of grades. Thus, please do not ask me to round your grade at the end of the semester.

At the end of every semester, there is always at least one student who asks to have his/her final grade changed due to some external heart-breaking circumstance (e.g. I need an “A” because a “B” will keep my core GPA below 3.0 and I can’t graduate.) Don’t try this on me! It is a waste of my time and your time. The only time I ever change a grade at the end of the semester is if there is an error on my part in grading.

This syllabus is subject to change at any time and for any reason.
TECHNOLOGY REQUIREMENTS

In order to successfully participate in and complete this course, you must have access to a computer with internet access that can run the e-College software. You will also need access to word processing software (preferably Microsoft Word). Within the e-College interface, you must be accessible with the following tasks: reading and posting to a discussion thread, uploading and downloading documents from "Doc Sharing," uploading homework assignments/papers into an appropriate drop box, and taking exams online. If you are uncomfortable with performing these tasks, then you are encouraged to view the tutorial that is offered on the e-College website. In addition, you can always ask the e-College technical support staff or me if you require assistance.

ACADEMIC ETHICS:

"All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment." (See Student's Guide Handbook, Policies and Procedures, Conduct).

COURSE DROP POLICY:

Any student wishing to withdraw from the course must do so officially as outlined in the class schedule. THE INSTRUCTOR CANNOT DROP OR WITHDRAW ANY STUDENT. IF YOU SIMPLY STOP COMING TO CLASS WITHOUT FORMALLY DROPPING AND YOU HAVE A FAILING GRADE, I AM REQUIRED TO GIVE YOU AN F.

COURSE REQUIREMENT DEADLINES:

Credit will be given for ONLY those exam(s), program(s), homework(s) and/or project(s) turned in no later than the deadline(s) as announced by the instructor of this course. There will be no exceptions and no excuses accepted.

ACADEMIC ETHICS AND HONESTY STATEMENT:

Scholastic dishonesty is a violation of the Code of Student Conduct. Scholastic dishonesty includes, but is not limited to, cheating on a test, plagiarism, and collusion. "All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment." (See Student's Guide Handbook, Policies and Procedures, Conduct).

Academic dishonesty includes, but is not limited to, cheating on tests, plagiarism and collusion. Cheating includes copying from another student's test or homework assignments or projects or quizzes, using materials not authorized, collaborating with or seeking aid from another student during a test, knowingly using, buying, selling, stealing, or soliciting the contents of an unadministered test, and substituting for another person to take a test. Plagiarism is the appropriating, buying, receiving as a gift, or obtaining by any means another's work and the unacknowledged submission or incorporation of it in one's own written work. Collusion is the unauthorized collaboration with another person in preparing written work for the fulfillment of course requirements. Academic dishonesty is a serious offense in college. You will be given not only a failing grade on the assignment or test, but also a failing grade for the class. Further, it will result in suspension from college.

This syllabus is subject to change at any time and for any reason.
PLAGIARISM:

In any written paper or test or assignment or quiz or project including code and/or documentation, you are guilty of the academic offense known as plagiarism if you half-copy or copy another author's sentences, words or any part of the content. This will result in an automatic grade of "F" for the course. Hence any of these must be fully avoided in order not to fail the class. Students copying from work done in previous semesters by former students as well as copying from internet sources without proper referencing will result in you failing this course. You cannot mix the author's words with your own or "plug" your synonyms into the author's sentence structure. To prevent unintentional borrowing, resist the temptation to look at the source as you write. The author's words, phrases, sentences must be put in your words and in your way of writing! When you do this, you are demonstrating your ability to understand and comprehend the material!

STUDENTS WITH DISABILITIES:

Students requesting accommodations for disabilities must go through the Academic Support Committee. For more information, please contact the Director of Disability Resources & Services, Halladay Student Services Bldg., Room 303D, (903) 886-5835.
