**COURSE REQUIREMENTS**

The basis of this course is to provide the student with an understanding of functions that are important to campus level administrators. The course is made up of a series of assignments and assessments to assist you in achieving that level understanding.

The course is designed to be a lecture and problem-solving format. However, this particular course is heavily web-enhanced and requires the learner to utilize technology to access information, submit assignments, and take quizzes and exams.

**Assignments**

*Student Learning Outcomes 1,2,3,5,6,7*
Assessment Method: Assignments will take several forms and include projects in budgeting.

Discussions

Each student is expected to participate through E-College, complete all reading and written assignments on time, and actively engage in class by closely connecting class topics and discussions to textbook and other readings. Participate online at least two weekdays each week by responding to prompts and responding to the answers of others. Participate in endeavors with the goal of contributing meaningfully and implementing higher order thinking skills. You cannot receive participations points if you are not contributing to the class discussion. To earn participation points, you must discuss and apply knowledge of the readings.

You should read, analyze, and respond to the issues of the week/questions and comments from me and the other members of the class. In short, you are required to actively participate in our classroom discussions and online. You must do more than complete assignments; you must demonstrate your regular reading of others’ responses. In other words, I am looking for evidence that you are an active participant in the learning experience. This can be done by relating real world experiences to the discussions or summaries, building on other’s comments with alternative solutions, and pointing out problems or adding another dimension to the discussion. Saying, “I agree” does not fall within the above parameters. Responses should be substantial (i.e. not one sentence).

The discussion forums are related to the chapter readings, external resources, and activities. Upon completion or near completion of the assigned readings and activities, you are expected to engage in an ongoing discussion/debate with your learning community peers. Your contributions to the discussion forums will be graded for
quality and timeliness of your contributions.

*Student Learning Outcomes 1, 3, 4:* The student will articulate understanding finance concepts through examination and discussion.

*Assessment Method:* Class participation will be determined by the professor. Each online forum will be graded using the Discussion Forum Rubric.

**Exams**

*Student Learning Outcomes - All*

*Assessment Method:* The examination will be comprised of true/false and essay questions.
