COURSE DESCRIPTION

Pre-requisite: Math 314, knowledge about DE may be of help

Students Learning Outcomes: The student will learn to interpolate data applying Fourier Transforms. Will study methods that approximate the solution of ordinary differential equation (ODE), System of ODE, and partial DE. The students will develop skills to apply the above methods and to program them by using MatLab functions. They will accumulate knowledge how to perform independent study and present this, also will develop skill and knowledge how to generalize theoretical problems and methods.
