Course Description:

The doctoral student only seminar is designed to provide students with the opportunity to create and/or refine their understanding of educational governance. This understanding will be built as students acquire knowledge and skills from theories, research, and current practices related to governance in education. In addition, the course is structured to provide students with the opportunity to explore and understand current issues in school governance. At the conclusion of the course, students should be able to utilize this understanding of educational governance and its issues in their formal and informal studies in the field of educational administration.

2. The learner will demonstrate an understanding of the formal and informal roles of various constituencies including school administrators, site-based planning teams, local school boards and state education agencies, state legislatures, and court systems in governing American public education.

3. The learner will demonstrate knowledge of current trends and issues like immigration, choice programs, charter schools, the growing education industry (i.e. textbook and testing), incentive reward funding systems and high stakes assessments etc., special interests groups, and the ways in which these movements shape public education.
4. The learner will demonstrate knowledge of the diverse typology of K-12 educational institutions including public schools, private religious schools, private independent schools, private boarding schools, charter schools (and privately managed public schools), magnet schools, and alternative.

5. The learner will demonstrate an understanding of the key administrative roles and functions within an organization and the strategies which contribute to organizational efficiency and effectiveness.

COURSE REQUIREMENTS

Instructional / Methods / Activities Assessments

This web-based course relies heavily on written responses, interaction, and discussion. It is problem-based and inquiry oriented. Learning in this course will take place as a result of online discussion boards, lectures/power-point presentations, readings and concentrated study, and participation in intensive group learning exercises in online venues.

Assignments include a series of written responses to readings and online discussions. The readings cannot be neglected. It is important that you set aside time to read and digest the readings before you write or participate in discussion boards.

A wide variety of instructional methods will be used to provide students with meaningful learning experiences. Some of these will include focused discussions, written reflections, problem-solving activities, case-studies, independent research, and the direct teaching model.

Assignments

Student Learning Outcomes: 1,2,3,6,8

Assessment Method: Assignments will take several forms including independent research and writings.

Discussions

Each student is expected to participate through E-College, complete all reading and written assignments on time, and actively engage in class by closely connecting class topics and discussions to textbook and other readings. Participate online at least two weekdays each week by responding to prompts and responding to the answers of others. Participate in endeavors with the goal of contributing meaningfully and implementing higher order thinking skills. You cannot receive participations points if you are not contributing to the class discussion. To earn participation points, you must discuss and apply knowledge of the readings.

You should read, analyze, and respond to the issues of the week/questions and comments from me and the other members of the class. In short, you are required to actively participate in our classroom discussions and online. You must do more than complete assignments; you must demonstrate your regular reading of others’
responses. In other words, I am looking for evidence that you are an active participant in the learning experience. This can be done by relating real world experiences to the discussions or summaries, building on other’s comments with alternative solutions, and pointing out problems or adding another dimension to the discussion. Saying, “I agree” does not fall within the above parameters. Responses should be substantial (i.e. not one sentence).

The discussion forums are related to the readings, external resources, and activities. Upon completion or near completion of the assigned readings and activities, you are expected to engage in an ongoing discussion/debate with your learning community peers. Your contributions to the discussion forums will be graded for quality and timeliness of your contributions.

*Student Learning Outcomes:* 2,4,5,7

*Assessment Method:* Class participation will be determined by the professor. Each online forum will be graded using the Discussion Forum Rubric.

**Exams**

*Student Learning Outcomes:* 1-8

*Assessment Method:* The examination will be comprised of essay questions.
