Student Learning Outcomes
This course is intended to provide a practical understanding of string performance and pedagogy. This understanding will encompass the actual performance and application of problems in teaching beginning string classes in public schools, private instruction and/or conducting a public school orchestra. Emphasis will be placed on playing ability and diagnostic techniques utilized as well as information from required readings. Consistent outside practice and reading is required and necessary for success in this class. Regardless of prior experience, students are expected to learn the course content and show progress from their entry-level skill.
