Text: No

Catalog Description: PHYS 401, Current Problems. 1 semester hour
Current problems or topics in research, employment, and trends in physics and astronomy
are considered. Students are required to attend all department colloquia and seminars on
Thursday. Research projects may be assigned during the semester

Student Learning Outcomes:

Objective 1: Students will have a broad overview of the latest development in the
forefronts of physics and astronomy

Objective 2: Students will learn how active scientists analyze problems, develop
strategies and set up experiments to test hypothesis and solve problems

Objective 3: Students will learn presentation and communication skills

Objective 4: Students will learn how to become a life-long learner

Grading: on satisfactory or unsatisfactory basis. Attendance will be
taken during each class. Absence twice without pre-approval or
acceptable/verifiable excuse will lead to an unsatisfactory final grade

Cheating, Plagiarism, and other Breaches of Academic Conduct:
Academic cheating, plagiarism, and other forms of academic misconduct may result in
removal of the student from class with a failing grade or may in extreme cases result in
suspension or expulsion from the University as described in the “Code of Student
Conduct” section of the Student's Guidebook.

Classroom Behavior:
Disorderly conduct which interferes with the normal classroom atmosphere will not be
tolerated. The classroom instructor is the judge of such behavior and may instruct a
disorderly student to leave the room with an unexcused absence or, in more serious
situations, a student may be removed from the class with a failing grade. All students
enrolled at the University shall follow the tenets of common decency and acceptable
behavior conducive to a positive learning environment. (See Student’s Guide
Handbook, Policies and Procedures, Conduct)
**Attendance and Tardiness:**

*Students are expected to be on-time and present for all class meetings.* Excused absences can be arranged prior to the class period being missed for appropriate activities as determined by the instructor. If an emergency results in an absence, the student should contact the instructor *as soon as possible* informing the instructor of the emergency and inquiring about ways to make up the missed class. The instructor will make judgments on how to handle the situation. Possible reasons for an excused absence are listed in the *Student's Guidebook* under class attendance policy. A student who is tardy at the time roll is called may be marked absent. **Attendance records will be maintained. Any student who misses more than three consecutive classes without a proper excuse will be penalized a letter grade.**

**ADA Eligible Students:**
ADA eligible students should make arrangements with the instructor in the first week of the semester about special arrangements needed for classroom or testing facilities and procedures to accommodate the disability.

**Evaluation of Instruction:**
Students will be given opportunities to evaluate instruction near the end of the semester. The physics department utilizes a scantron-graded questionnaire with statements regarding various elements of instruction and in addition utilizes an open-ended form where students can make comments on all elements of the classroom. These comments are given to the instructor and department head soon after the grades are recorded. If students have concerns about the classroom experience during the semester they should inform the instructor of those concerns and failing a satisfactory response may, as a last resort, contact the physics department head with those concerns.
