Course Description:
A critical discussion of the sociological perspectives on studying descriptions, causes, and prevention of social problems such as crime, mental illness, drug abuse, environmental degradation, poverty, terrorism, and declining quality of life in today’s world.

Student Learning Outcomes:
This course is intended to enable you to learn and think critically about:

1. What social problems are (and what they are not) and how they occur
2. Why social problems occur (explanations will be addressed with the help of sociological theories)
3. Inform you on how social problems affect us or what their consequences are for the individual and for society
4. How to deal or cope with social problems (including realization that the problems in society are realities, they will occur in one form or another, even if we don’t want them
to, and that we may not necessarily ‘solve’ them or illuminate them; only that we may develop ways to prevent them as much as possible.

5. To describe the social connections in social life, to analyze them with sociological theories, and apply these analyses to hypothetical or real life situations.

6. To develop critical thinking skills as they relate to understanding the ongoing social life in any society.

7. To allow you to expand your understanding of basic sociological terminology and concepts as they relate to current social issues.

It is strongly recommended that you perform a “Browser Test” prior to the start of your course. To launch a browser test, login to ECollege, click on the ‘myCourses’ tab, and then select the “Browser Test” link under Support Services.

For those of you who are not familiar with eCollege, I suggest you take the tutorial offered online. Should you have any questions, feel free to contact the folks in Technology Services.
