ENG 697: Graduate Introduction to Semantics  
Spring 2013, R 4:30–7:10p, BA 244

Instructor: Christian F. Hempelmann, Ph.D.  
Office: Hall of Languages 226  
Office Hours: 
  online workdays 10am–10pm  
office R 2–4pm  
Phone: (903) 886-5291  
Fax: (903) 886-5980  
Email: c.hempelmann@tamuc.edu

COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings:  
Required textbooks:  
Further texts will be made available online, including:  
  • A Concise History of Linguistic Semantics.  
  • Readings on the Semantics of Humor.  
  • Readings on Computational Semantics.

Course Description:  
This course will look at how language at various levels—word, sentence, or text—is related to meaning, how language is used to create direct and indirect meaning between speaker and hearer, and how meaning can be represented. We will study the history of linguistic semantics in relation to the semantics developed in other fields, such as philosophy and logic. A second focus will be on the social purposes and philosophical implications of the complex ways of making sense for each other, not least on the example of the intriguing semantics of humor. Finally, we will bring our understanding of the working of semantics to their application in automatic natural language processing.

Course Objectives
1. Students will become active participants in the course, not only in staying current with readings and other assignments, but in sharing their understanding of the material as assessed by written reading responses and participation in discussions.
2. Students will become familiar with basic concepts in semantics through readings and exercises from the textbook as well as current research in the field as assessed by reading responses summarizing and critically assessing the concepts.
3. Students will be able to write and present research on and in semantics in an informed and critical way, in particular an assigned presentation and a final project on a topic selected in coordination with the instructor and pertaining to the course.
4. Students will present their research to their colleagues and, perhaps, broader audiences.
COURSE REQUIREMENTS

**Instructional Methods, Activities, and Assessments**
This course consists of a series of activities and assessments to assist you in achieving the outcomes and objectives of this course and instructional units/modules. By the end of this course the class will have read the introductory textbook and additional materials, including research papers. The students will have discussed the readings, responded to them in writing, and researched an issue in depth so as to be able to give a class presentation and write a final paper.

**Weekly Readings, Responses, and Discussions**
For some of our weekly readings you are required to write a short 1-page (300-400 words) response addressing some aspect of the material that you find especially interesting. The main point is for you to think carefully about a particular issue. You can bolster an argument with additional information, point out shortcomings in the data or reasoning, show how the ideas don’t fit with other pertinent information, raise important questions for further research, or simply describe why you found the reading intriguing. For other readings, there will be exercises in class and as homework.

By the middle of the semester you will have identified a topic in semantics that you want to research in more detail. This research will result in a presentation in class and a 10-12pp research paper.

To receive full participation credit students must participate in discussions consistently by providing substantive comments, which requires staying current with all readings and assignments.

**Student Learning Outcome #1**
Students will demonstrate their ability to synthesize ideas pertaining to the course as measured by a review of critical responses and exercises from the students.

**Student Learning Outcome #2**
Students will conduct research on an assigned topic and will present the findings of their research to the class through a presentation as well as write a research paper. The presentation should be delivered on the assigned date and should include the following elements:
- a substantial overview;
- a handout including a reference list (enumerative bibliography, discography, etc.);
- any additional relevant information that is appropriate to the topic.

(40% of total course grade)

**Student Learning Outcome #3**: Students will demonstrate their understanding of ideas pertaining to the course as measured by a review of each student’s presentation on an assigned topic.

**Grading**
Assignment and course grades will be determined by the student's performance on the following assignments:

- Critical response papers and exercises: 40% of total course grade
- Final presentation and paper: 40% of total course grade
- Participation: 20% of total course grade
There will be no extra credit assignments. As a rule, I do not accept late work.

Scale used to compute final letter grades:
A: 100-90
B: 89-80
C: 79-70
D: 69-60
F: 59-0

COURSE AND UNIVERSITY PROCEDURES/Policies

Course Specific Procedures:
Academic Honesty Policy
Texas A&M University-Commerce does not tolerate plagiarism and other forms of academic dishonesty. Conduct that violates generally accepted standards of academic honesty is defined as academic dishonesty. “Academic dishonesty” includes, but is not limited to, plagiarism (the appropriation or stealing of the ideas or words of another person and passing them off as one’s own), cheating on exams or other course assignments, collusion (the unauthorized collaboration with others in preparing course assignments), and abuse (destruction, defacing, or removal) of resource material. Instructors uphold and support the highest academic standards, and students are expected to do likewise. Penalties for students guilty of academic dishonesty include disciplinary probation, suspension and expulsion (Texas A&M University-Commerce Code of Student Conduct 5.b[1, 2, 3]). Cheating, including plagiarizing papers in whole or part, will result in a grade of zero (0) on the assignment for the first offense and failure of the course for any subsequent offenses.

Attendance Policy
Because your active participation in discussions is expected, attendance is vital for success in this course. Attendance requires more than simply coming to class.

Assignment Policy
I will provide specific details during class meetings and possibly by email. Students must stay current with all readings and discussions. Students must complete and submit all assignments by their respective due dates.

Late Work
I will not accept any assignment after its due date. Assignments submitted after the due date may receive a score of zero (0).

Drop a Course
A student may drop a course by logging into his/her myLEO account and clicking on the hyperlink labeled “Drop a class” from among the choices found under the myLeo section of the Web page.

Incompletes
Incompletes (grade of “X”) are granted only under rare and extraordinary circumstances.

Administrative Withdrawal
I reserve the right to drop a student from the course administratively for excessive absences or violations of student conduct codes.

Email
Students are expected to check their TAMUC email at least once a day.

University Specific Procedures:

ADA Statement
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that
provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources and Services
Texas A&M University-Commerce
Gee Library 132
Phone (903) 886-5150 or (903) 886-5835
Fax (903) 468-8148
StudentDisabilityServices@tamu-commerce.edu
Student Disability Resources & Services

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. (See Code of Student Conduct from Student Guide Handbook).
The following course schedule is subject to revisions and other modifications as the instructor deems necessary for the course. Any changes to the course schedule will be announced in advance of the week in which the change will occur.
