

**ENVS 103.01W and 02W
Natural Disasters
SYLLABUS**

Instructor: Janet Hull
Office Location: online
Office Hours: M-S 10:00-7:00
Office Phone: 903-886-5378
University Email: Janet.Hull@tamuc.edu

COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings:

Textbook Required: Natural Disasters by Patrick Abbott, Eighth (9th) Edition. McGraw Hill.

Course Description:

This course is designed to increase your awareness about global natural disasters. The Earth is definitely on the move today, and understanding *why* more natural disasters are occurring will increase your appreciation of the immense power of our planet.

The material and information for lecture will come from the new textbook edition, and will be the focus of information on your weekly, unit tests.

This course will be fairly intensive, and you will have to spend some time

becoming familiar with geographic locations, worldwide. If you are on campus, you will find it worthwhile to look at the maps and globes in the library. As a result of this course curriculum, you will develop a renewed appreciation of the Earth and its inhabitants.

Prerequisites:

Intro to Geography, ENVS, or Intro to Geology preferred, but not required.

Student Learning Outcomes:

1. In the first part of this course, you will learn how natural disasters affect the cultural landscape;
2. In the second part of this course, you will learn how human beings influence the “impact” from natural disasters by altering the natural landscape;
3. During the entirety of the course, you will learn global geographic locations and become familiar with where natural disasters occur today, why they are increasing, and where they may occur in the future.

COURSE REQUIREMENTS

Instructional / Methods / Activities Assessments:

- A. Read each unit's overview and textbook assignments.
- B. Complete an exam after each unit, beginning with Unit One.

Grading:

- A. Fifteen (15) unit exams; 100 pts each (100% of course grade)

Unit Assignments:

- Each unit exam must be completed prior to starting the next unit, and will be available to take within a designated 48-hour period that is posted in the Test Section under each Unit.
- Each unit exam is timed, and exams can be open book. No unit exams are accepted once the next unit has begun. This means NO MAKE UP TESTS.
- You will have fifteen (15) unit exams; no Midterm and no Final exams will be given for this class;
- You have 48 hours to schedule a time to take your weekly tests, so no make-up tests are accepted after this 48-hour period.
- Make sure you are using a reliable Internet server; if your computer goes down during an exam, no extra make-up time will be granted. I suggest confirming a good connection. If you do go down, your previous work will be saved.

Grade Scale:

The grading for on-line classes is done by percentages, but at the end of the semester, the percentages translate into the following grade points:

- 90-100 = A
- 80-89 = B
- 70-79 = C
- 60-69 = D
- Below 60 = F

TECHNOLOGY REQUIREMENTS

You will be utilizing various forms of learning tools available on-line, through your textbook and on-line discussions. You will be required to monitor specific websites throughout this course, and I will email you those links when applicable.

VERY IMPORTANT:

If you experience computer issues during a test, do NOT log out of your test - immediately contact ecollege so they can witness the issues occurring at that time using screen share. If you log out, no one can help you resolve any problems, and you will not get credit for missing the test.

Each unit's material will consist of:

- An overview of the unit topic and the unit objectives. When you click on a unit, you will be taken first to the requirements.
- Lecture consists of both instructor emails and your chapter reading assignments.
- A unit test will be required after each unit. The tests will be based on book material, recommended Internet resources, and my lecture.
There will be no Mid-Term Exam or Final Exam for this course. 100% of your grade comes from the unit tests.
- There is no extra credit offered for the on-line format.

If the course software is new to you, it may help to go through the software tutorial. How to get started:

1. e-mail me to let me know that you are on line;
2. Read through the syllabus;
3. Click Unit 1 to read the unit overview;
4. Read your chapter assignments and the lecture notes for Unit 1;

5. Don't hesitate to contact ecollege with any questions – they are great.

The eCollege HelpDesk is available 24 hours a day, seven days a week. The HelpDesk can be reached by sending an email to helpdesk@online.tamuc.org or by calling 1-866-656-5511 and ask for Daryl Tate.

Note: when you quit a test session, always click on the "Exit Course" button at the bottom of your screen to save your work.

Students taking online classes at Texas A&M University-Commerce have the same rights as students enrolled in on-ground classes. The A&M-Commerce Student Guidebook details those rights and explains complaint and grievance procedures, as well as the Student Code of Conduct. Students have the right to appeal course grades, admissions committee decisions, or any adverse action taken by any *online* faculty against any student. The appeals process is the same for all types of appeals.

The student should first attempt to resolve the problem directly with the involved faculty member.

COMMUNICATION AND SUPPORT

Interaction with Instructor Statement:

I have taught Natural Disasters at A&M Commerce since 2010, and have recently written a book about the recent Earth changes. I also have an interactive blog on current environmental events, and I will email you that

blog link. Along with following my research work, you will also need to read each chapter in your textbook because the unit tests will focus on these chapters.

I try to monitor my email daily and I like to remain active with the class through email, so you can send me a message any time. I will answer you back as soon as I can. You can email at Janet.Hull@tamuc.edu.

The time you spend for this course will be equal to the time spent for an on-ground 3-hour course. There are fifteen (15) units to complete for the course; one unit each week. How you organize your daily schedule is completely up to you, but you must finish one unit each week. A unit test will be given after each unit. This course isn't hard, but it does consume a lot of time. If you don't get behind, you'll make it through O.K. **If you fall behind, there are no make-ups opportunities.**

COURSE OUTLINE

Course Content By Unit:

1. Human Disasters – Unit 1. Global geographic introduction into populations and their locations.
2. Internal Energy – Unit 2. Knowledge of the Earth's internal processes enhances a deeper understanding of earthquakes, tsunamis, volcanoes, and violent storms.
3. Seismology – Unit 3. What is an earthquake? This unit requires understanding the different types of earthquakes, where they occur, and why.
4. Plate Tectonics – Unit 4. The theory of Plate Tectonics and crustal movement provides the core to understanding many natural disasters.

5. Earthquakes in US and Canada – Unit 5. Studying past earthquakes in USA and Canada helps us predict future disasters, and hopefully, prevents human devastation in North America.
6. Tsunamis– Unit 6 (**skip to Chapter 8**). Earthquakes cause tsunamis, which are one of the most damaging natural disasters on Earth. Not every earthquake spawns a tsunami, and Unit 6 (Chapter 8 in your book) explains how they form and their dangers.
7. Volcanic Eruptions - Unit 7 (**back to Chapter 6**). Unit 7 introduces how a volcano forms, and where they are found along plate boundaries. Unit 7 requires daily monitoring of current volcanic eruptions.
8. Volcanoes From the Past - Unit 8 (**Chapter 7**). You will learn about past volcanic eruptions to increase awareness for what can occur again in the future.
9. Weather and Climate – Unit 9. This unit introduces the mechanics driving the atmosphere, our climate and local weather. Before weather patterns can be understood, the energy systems fueling our air and water must be studied.
10. Tornadoes and Storms – Unit 10. This unit introduces how tornadoes and thunderstorms form.
11. Hurricanes – Unit 11. This unit introduces how hurricanes form and where they are the most common.
12. Climate Change – Unit 12. With the knowledge you have gained from the previous unit studies, this unit brings all the current issues of climate change to the forefront.
13. Floods – Unit 13. One of the biggest disasters caused by climate change is flooding. This unit explains why and where floods occur worldwide.
14. Fire – Unit 14. Human beings do not always start wildfires. Nature, through lightening and climate changes, ignite some of the most deadly wildfires known to man. These disasters occur when humans build neighborhoods and cities within natural areas prone to wildfires.

15. Space Objects- Unit 15 (Chapter 17). This unit introduces the types of extraterrestrial objects that can impact the Earth and cause global natural disasters. (Chapter 17 in your book)

COURSE AND UNIVERSITY PROCEDURES/POLICIES
--

Course Specific Procedures:

On-line courses are dependent on your course syllabus. Make sure you read the syllabus carefully! **The #1 key to success on-line is to keep up with your assignments every day. Do not procrastinate on any assignments or you will fall behind.**

The tests for each unit will be given every week, and all unit tests will be open book. The tests are timed, however, so you must know this material **before** each exam. **No tests will be accepted late, after the unit test has closed.**

University Specific Procedures:

ADA Statement

Students with Disabilities:

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources and Services

Texas A&M University-Commerce

Gee Library- Room 132

Phone (903) 886-5150 or (903) 886-5835

Fax (903) 468-8148

StudentDisabilityServices@tamu-commerce.edu

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. (See *Code of Student Conduct from Student Guide Handbook*).
