Math 142.001 (3 semester hours)
COURSE SYLLABUS: Spring 2015

Instructor: Dr. Pamela S. Webster
Office Location: Binnion Hall Room 315
Office Hours: Tuesdays/Thursdays, 10:45 – 11:30am & 2:15 – 3:00pm;
Wednesdays 10am - noon
Office Phone: 903.886.5950 Office Fax: 903.886.5945
University Email Address: Pamela.Webster@tamuc.edu

COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings:

Textbooks: *Precalculus*, 6th edition, by Stewart, Redlin, and Watson. ISBN # 978-0-8400-6807-1. Parts of all of the following chapters will be covered: 1, 2, 5, 6 7, 8, and 11. Other content TBD.

Calculators: A graphing calculator should be used during this course. I highly recommend a **TI-83 or TI-84** be used throughout this course. If you choose to use a different calculator, please note that the instructor will not be a good resource for you to be able to use your calculator.

Course Description:

Trigonometric functions and their graphs; radian measurement; solutions of triangles; identities; logarithmic and exponential functions; trigonometric equations; applications of trigonometry; conic sections and their graphs. Prerequisite: Math 1314.

Student Learning Outcomes:

Upon completion of this course, the successful student will be able to:

1. Demonstrate problem solving ability.
2. Apply trigonometry to physical situations and theoretical problems.
3. Understand functions, identities, and graphical information.
4. Perform basic proofs using trigonometric identities.
5. Judiciously use appropriate technology to achieve these outcomes.
6. Be eligible to enroll in Calculus I.

Core Objectives:

**Critical Thinking.** Students will be able to analyze, evaluate, or solve problems when given a set of circumstances or data. This common core learning objective will be assessed on the final exam using key questions that will fulfill these objectives.
Communication. In written, oral, and/or visual communication, Texas A&M University-Commerce students will communicate in a manner appropriate to audience and occasion, with an evident message and organizational structure. This common core objective will be assessed using class activities with class discussion of trigonometric identities, graphs, and application problems.

Empirical and Quantitative Skills. Students will be able to understand and utilize mathematical functions and empirical principles and processes. This common core learning objective will be assessed using in class discussion and projects, homework, and final exams.

COURSE REQUIREMENTS

Instructional / Methods / Activities Assessments

Instructional Methods: Instruction will include lectures, demonstrations and models, and some group and individual work, based on the time available.

Attendance: I will be taking roll every class. All students are expected to be present, and attendance will be reflected in your Daily Work grade. If you miss a class, come see me for any missed assignments. Please do not approach me as I am beginning a class period, unless it is an emergency, so that we might start ON TIME. Please be in your seat and ready to work when class begins.

Daily Work: Homework will be assigned most class periods. It is extremely important for you to work all homework in order to be prepared for the exams. We will also be working on certain supplemental assignments which will often have to be completed as homework. The total number of assignments that are completed and turned in (punctually) by the student will be reflected in the Daily Work grade. A grade will be taken on select problems from each homework assignment. Late work will not be accepted, no matter what the cause. A missed homework assignment or two, due to legitimate absence, will not have a tremendous adverse effect on your grade as long as you have kept up with all other assignments. Quizzes: Both individual and group quizzes may be given occasionally. Since regular attendance is expected, NO make-up quizzes will be given. This class covers enough material that there is no time to be missed that is a “good time”, and each quiz will be over material to be emphasized on exams. Quizzes will average into your Daily Work grade.

Class Activities/Projects: Problems in trigonometry that have interesting applications for the class and real life with be introduced periodically into the class discussion. Regular attendance will assist students with being able to participate in these activities and projects. These projects will vary in their scope and should be completed neatly and punctually.

Tests: Tests will be given after a complete chapter or subject area. These exams will be announced at least a week in advance. CELL PHONES and other electronic devices must be turned off and stored out of the student’s reach. The only electronic device allowed during tests and quizzes is a stand-alone calculator, and only with the instructor’s consent. Note: Calculators that solve problems for students, including but not limited to the TI-NSpire, TI-89, Casio Prizm, Casio Touch, or higher, are NOT allowed to be used for exams.
There will be FOUR “chapter” exams which may consist of a variety of problems and short answer questions. However, students should expect the bulk of the questions on each test to be problem solving. Partial credit may be given on exams IF all work is neatly shown so that I can easily determine the student’s mistakes. When pictures are drawn, students should be careful that figures are clearly marked and easily understood. Explanations should be explicit and understandable to the audience given. Items should NOT need interpretation if full credit is to be given.

**Tentative test dates (although not in stone) are the weeks of (normally Thursdays):**
February 12th, March 12th, April 9th, and April 30th.

**Replacing a Low Test Grade:** I realize that at times throughout the semester, emergency situations may arise that affect a student’s performance on an exam or even prevent a student from attending on a test day. However, make-up exams will NOT be given unless confirmed ahead of time and accompanied by a documented, University excused absence. Therefore, I am willing to replace the student’s ONE lowest exam grade with the student’s grade on the corresponding portion of the final exam, provided the grade on that section of the final exam is higher. This provision will only be applied to ONE exam, so students should make every effort to be present and well-prepared for all exams.

**Final:** Our final is a comprehensive exam. The Class Schedule gives our time to have our final exam as **Thursday, May 13th, at 8:00am – 10:00am.** Do not expect a makeup exam for the final.

**Grading Policy:**

<table>
<thead>
<tr>
<th>Section:</th>
<th>Total:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Daily Work (Homework, Quizzes, Projects, etc.)</td>
<td>15%</td>
</tr>
<tr>
<td>Tests (4 exams)</td>
<td>60%</td>
</tr>
<tr>
<td>Comprehensive Final</td>
<td>25%</td>
</tr>
</tbody>
</table>

**Grading Scale:**

- 90-100+ A
- 80-89 B
- 70-79 C
- 60-69 D
- 59-below F

**TECHNOLOGY REQUIREMENTS**

A calculator (TI-83 or TI-84, preferably) is REQUIRED for this course.

Internet access. If you use the e-book, you will need to be able to access the site.

Word processing software (Microsoft Word preferred/compatibility required)

Email access is required. Please utilize your A&M-Commerce email address, or make me aware of your alternate email address.
Interaction with Instructor Statement:
Students will be expected to interact with the instructor(s) in class or via electronic means in an appropriate manner. All instructor contact information is listed on this syllabus and should be used. Please use email to facilitate a quick response.

Course Specific Procedures:

Getting Help Outside of Office Hours: The Math Skills Center, located in Binnion 328, is open Monday and Wednesday, 8am – 8pm; Tuesday and Thursday, 8am – 6pm; Friday, 8am – noon. I am the director of the center and I do my best to place quality tutors in the lab. For information on which tutors would be best to help, and when they are working, feel free to see me or the bulletin board outside the lab. Mach III/TRIO Services, located in the Halladay Student Services building, Room 300, is available to students who meet certain criteria, such as being a first-generation college student, etc. Contact TRIO at 903-886-5833. The Academic Success Center offers tutoring in the library, as well as Supplemental Instruction. Their hours can be found on the university web site.

Comments: I will do my best to make a quality presentation each day and, in return, I expect that you will do your best to learn the material presented in class and in the text. This course will be taught as hands-on as possible, and student participation is necessary daily. It is important that you be actively engaged in any group activities. Questions are welcome in the classroom, and I will gladly schedule outside help sessions if necessary. I know that together, these efforts can contribute significantly to your education in this class.

Students who are absent more than 6 times, for whatever reason, are subject to the instructor dropping them from the course. Six absences in this course constitutes missing 1/5 of the course, which is a very large fraction of material for a student to miss. Any student who is close to this number of absences should come to the instructor before they accumulate four absences in the course.

As stated in the Student Handbook, academic dishonesty in the class will not be tolerated. If any materials or equipment are found to be available to the student at any time which is considered inappropriate by the instructor, the very fact that the materials are inappropriately available to the student is grounds for an accusation of academic dishonesty. The instructor reserves the right to fail the student for the assignment or the course, as well as report the student to the Academic Dean and/or the Dean of Students. The above deans have the ability to terminate the student’s enrollment in the University. The instructor considers this an extremely serious matter. Please make sure you are not in a situation that could be viewed negatively.

I find that a majority of students are honest in doing their school work. However, we must take measures to protect the academic integrity of the classroom. I have a NO TOLERANCE policy for cheating and if you are caught cheating, you will fail that portion of the course, and probably the entire course. Cheating in this course is defined as (but not limited to) the following:
• Giving or receiving answers during an exam or quiz.
• Viewing the exam or quiz answers of nearby classmates.
• Having notes/practice work/etc. available during quizzes or tests.
• Possession or access to test items before the test is given.
• Deception in getting an excused absence to obtain the undeserved opportunity to make-up work.
• Use of cell phones or text messaging technology during exams or quizzes. **You may not use the calculator on your cell phones.**
• Improper citations in written works, or using another person's ideas and words as your own without giving proper credit.
• **Any** method, no matter how well rationalized or accepted, which gives an unfair advantage and/or improves a person's grade by any means other than study and skillful performances on exams and/or other assignments.

Students found guilty of an act of academic dishonesty in this course will be subject to receiving an “F” in this course, as well as the above-mentioned disciplinary actions.

**Specific additional disciplinary action for these offenses may include any combination of the following:**

- Point deduction of an assignment
- Failure of an assignment
- A grade of zero for an assignment
- Failure of this course
- Referral to the Academic Integrity Committee or department head for further action
- Referral to the Dean of the College of Science and Engineering, and other Deans as appropriate
- Referral to the University Discipline Committee

**Supplemental Instructions:** Throughout the course of your work in this class, you will be given additional written instructions that govern the look, content and scope of your projects. These supplemental instructions have the same force as the syllabus for grading purposes.

**University Specific Procedures:**

**ADA Statement**

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

**Office of Student Disability Resources and Services**
Texas A&M University-Commerce
Gee Library 132
Phone (903) 886-5150 or (903) 886-5835
Fax (903) 468-8148
StudentDisabilityServices@tamu-commerce.edu
Student Disability Resources & Services
Anti-Discrimination

A&M-Commerce will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information, or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity, or gender expression will be maintained.

Student Conduct

“All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment.” (See Code of Student Conduct from Student Guide Handbook).

All students are expected to exercise self-discipline and respect for the rights of others at all times. Behavioral disruptions that interfere with the business of the classroom or with an individual’s ability to learn may be referred to the Dean of Students.

Please be sure that cell phones and other electronic devices are off or silent. If you expect to have to get up, please select an inconspicuous position to minimize disruptions. Courtesy to others is important. That means respecting the opinions of others, and in general, doing your part to make this a positive learning environment for all students. Food and beverages, while acceptable, should be consumed as quietly as possible, and you must clean up after yourself.

Early Intervention for First Year Students

Early intervention for freshmen is designed to communicate the University’s interest in their success and a willingness to participate fully to help students accomplish their academic objectives. Grades for students in freshmen level classes will be reported to the Registrar’s Office at the end of the fifth week of class during the fall and spring semesters. The Registrar’s Office will report grades to students, Advising Services Academic Departments (faculty advisors), and mentors. This procedure will allow students to be knowledgeable about their academic progress early in the semester. The university, through Advising Services, faculty advisors, and mentors, will take steps to assist students who may be experiencing difficulty to focus on improvement and course completion. Grade reports will be mailed by the end of the sixth week of the semester.

Remaining enrolled in this course constitutes acceptance of all policies contained in this syllabus.

Any changes to this syllabus will be communicated directly to you in class by the instructor. You are responsible for being aware of any such changes.

Good luck and work hard!!
TENTATIVE SCHEDULE

Week 1 – Review Chapter 1
Week 2 – Review Chapter 2
Week 3 – 5.1 and 5.2
Week 4 – Review and Exam 1
Week 5 – 5.3 and 5.4
Week 6 – 6.1, 6.2, and 6.3
Week 7 – 6.4, 6.5, and 6.6
Week 8 – Review and Exam 2
Week 9 – 7.1 and 7.2
Week 10 – 7.3, 7.4, and 7.5
Week 11 – Review and Exam 3
Week 12 – 8.1, 8.2, and 8.3
Week 13 – 11.1, 11.2, and 11.3
Week 14 – 11.4, Review, and Exam 4
Week 15 – Review for Final
Week 16 – Final Exam (See Exam Schedule online or Final exam schedule above)
