“All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment.”
(Student’s Guide Handbook, Policies and Procedures, Conduct.)
Rude and/or disruptive behavior will not be tolerated.
No electronic devices (except calculators) are allowed during class time.

TEXT: Applied Mathematics for the Managerial, Life and Social Sciences 6th Edition by Tan, ISBN # 978-1133108948, the text is REQUIRED.

REQUIRED MATERIALS: Binder or folder, text and TI 83 or 84 calculator (see below).

TECHNOLOGY REQUIREMENTS: The graphing calculator of TI 83/TI 84 or equivalent will be highly recommended. Calculators other than Texas Instruments calculators may be used but classroom instruction on calculators will be given for TI equipment only. **Note: Calculators that solve problems for students, including but not limited to TI-Nspire, TI 89 or higher, Casio Prizm, Casio Touch or higher are NOT allowed to be used for this class. ** Students are also required to clear the memory of graphing calculators before and after each exam.

COURSE DESCRIPTION AND OBJECTIVES: We will cover chapters 9, 10, and parts of chapters 11 & 12. Topics include limits, continuity, derivatives, and integration.

CORE OBJECTIVES:

1) Students will be able to analyze, evaluate, or solve problems when given a set of circumstances or data.
This common core objective will be assessed in the exams and final exam for all sections of Math 176.

2) In written, oral, and/or visual communication, A&M-Commerce students will communicate in a manner appropriate to audience and occasion, with an evident message and organizational structure.
This common core objective will be assessed using common class activities with class discussion over limits, continuity, derivatives and integrals and how these topics relate to the field of business for all sections of Math 176.

3) Students will be able understand and utilize mathematical functions and empirical principles and processes. This common core objective will be assessed using class activities, homework problems, exams and final exam for all sections of Math 176.
STUDENT OUTCOMES: Upon successful completion of this course a student will:

1) Demonstrate knowledge and understanding of topics including, but not limited to limits, continuity, derivatives and integration and apply these topics in various fields of business.

2) Demonstrate problem solving skills in the solving of complex business word problems.

3) Understand functions and their graphs.

TESTS: We will have three-100 point tests plus a comprehensive final. A TENTATIVE test schedule is below, but that is subject to change. In general, NO makeup tests will be given, although you may replace your lowest exam grade with the final exam grade.

Test 1- Week of 2/23
Test 2- Week of 3/25
Test 3- Week of 4/29

FINAL EXAM: Wednesday, May 13, 1:15pm-3:15pm

HOMEWORK: You are expected to complete all homework assignments and turn them in the next class day unless otherwise instructed. Quizzes will occasionally be given in class over the material presented in the homework. NO makeup quizzes will be given.

GRADES: Tests: 60% (20% each)  
Homework/Quizzes: 10%  
Final: 30%

Grade: A = 90-100, B = 80-89, C = 70-79, D = 60-69, F = 59 or below

ATTENDANCE and CONTINUAL ENROLLMENT POLICY: Class attendance is expected and a MUST to pass this course, and it is your responsibility to attend punctually and regularly. Roll will be taken every class period and excessive absences will result in being dropped from this course.

DROPPING THIS COURSE: You may drop this course anytime before the drop deadline, but keep, in mind you will only receive a DP if you are passing and have attended class 75% of the time. Otherwise, you will receive a DF.
GETTING HELP: If you need additional help outside my office hours or outside the times of the SI sessions, the Math Skills Center in Binnion 328 offers free tutoring Monday and Wednesday from 8am – 8pm, Tuesday and Thursday from 8am – 6pm, and Friday from 8am – 12pm.

The Mach III/TRIO Program is available for students who qualify for additional resources, such as private tutoring. In order to qualify, students must meet certain conditions, such as being a first-generation college student. For more information, contact Ronnie Brooks at 903-886-5833 or in the Halladay Student Services building, Room 301.

“The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact: Office of Student Disability Resources and Services, Room 132, Gee Library, or call 886-5835.”

STUDENT CONDUCT: Appropriate classroom behavior is required to attend this class. All cell phones must be put on silent during class. Phones are a distraction for me and the other students in the class. All people will be treated with respect and I will not allow talking that will disrupt my lectures. If disruptions occur during class lectures, you will be asked to leave class and will earn a zero on any applicable grades for that class period. Serial disrupters will be asked to withdraw from my class.

GRADE REPORTING FOR FRESHMEN: Grades for students in freshmen level classes will be reported to the Registrar's Office at the end of the fifth week of class during the fall and spring semesters. The Registrar's Office will report grades to students, Advising Services, Academic Departments (faculty advisors) and mentors. This procedure will allow students to be knowledgeable about their academic progress early in the semester. The university, through Advising Services, faculty advisors and mentors, will take steps to assist students who may be experiencing difficulty to focus on improvement and course completion. Early intervention for freshman students is designed to communicate to students the University's interest in their success and willingness to participate fully to help students accomplish their objectives.

ACADEMIC INTEGRITY:

As stated in the Student Handbook, academic dishonesty in the class will not be tolerated. Included with other forms of academic dishonesty, if any materials or equipment are found to be available to the student at any time which is considered inappropriate by the instructor, the very fact that the materials are inappropriately available to the student is grounds for an accusation of academic dishonesty. The instructor reserves the right to fail the student for the assignment or the course, as well as report the student to the Academic Dean and the Dean of Students. The above deans have the ability to terminate a student’s enrollment in the University. The instructor considers this an extremely serious matter. Please make sure you are not in a situation that could be viewed negatively. I have a NO TOLERANCE policy for cheating and if you are caught cheating you will fail this course. Cheating in this course is defined as the following:

Mission for College of Science and Engineering: Innovation and Discovery
Mission for the Department of Mathematics: Discovering the Keys to Success
• Giving or receiving answers during an exam or quiz.
• Viewing the exam or quiz answers of nearby classmates.
• Having notes/practice work available during quizzes or tests.
• Possession or access to test items before the test is given.
• Deception in getting an excused absence to obtain the undeserved opportunity to make-up work.
• Use of cell phones or text messaging technology during exams or quizzes. **You may not use the calculator on your cell phones.**
• Improper citations in written works, or using another person’s ideas and words as your own without giving proper credit.

**Any** method, no matter how well rationalized or accepted, which improves a person’s grade by any means other than study and skillful performances on exams and/or other assignments.

*By remaining enrolled in this course, you are agreeing to abide by these policies.*
1. Go to [www.webassign.net](http://www.webassign.net) and click **Have a class key?**.

2. Enter the class key your instructor gave you and click **Submit**.  
   The class key is: **tamuc 3747 0415**

3. On the verification page, check the class information and determine whether or not the correct class and section is displayed.
   - If the correct class and section is listed, click **Yes, this is my class**.
   - If the listed class or section is not correct, click **No this is not my class**.

Try entering your class key again, in case you might have mistyped a character. If the correct class is still not displayed, contact your instructor.

4. If you have an existing WebAssign account, select **I already have a WebAssign account**, type the **Username**, **Institution**, and **Password** for your account, and click **Continue**.

You are enrolled in the class and logged in to WebAssign using your existing account.

5. If you do not have an existing WebAssign account, you can create one now.
   a. Select **I need to create a WebAssign account**, and then click **Continue**.
   b. [Log in information form]
c. Type the username that you would like to use for your WebAssign account in the **Preferred Username** field, and click **Check Availability** to see if the username that you want is available.

Usernames in WebAssign® can contain letters, numbers, and the following characters: underscore (_), hyphen (-), and period (.). Usernames are not case-sensitive, so MaryAllen, maryallen, and mArYaLiEn are all the same username.

da. After confirming the availability of your new username, type a password in both the **Choose a password** and **Confirm password** fields.

Ensure that your password meets the displayed requirements, which might be different than those shown above.

Passwords are case-sensitive, so IAmCa3sar is not the same as iamca3sar.

e. Enter your **First Name**, **Last Name**, and **Email Address**, and optionally your **Student ID Number**.

f. Click **Create My Account**.

WebAssign confirms that your account has been created. You should only enroll in the class once. You can click **Log in now** to log in to the new user account and go to your home page. **Remember your username and password, because you will need them each time you log in.**
