Math 2143.003 Calculus I  
COURSE SYLLABUS: Fall 2014

Instructor: Rebecca Dibbs, PhD  
Office Location: 303 Binnion  
Office Hours: M 2-3 & 6:20-7:20; T 10-11; W 2-3; R 10-11  
Office Phone: 468-8660  
University Email Address: Rebecca.Dibbs@tamuc.edu

COURSE INFORMATION

Materials

**Textbook(s) Required:** Calculus, 7th Edition, by James Stewart. Material covered during the session will be Sections 1.4-1.8, Chapters 2, 3, and 4, and 6.2, 6.3, and 6.4. We may occasionally cover enrichment activities not in the text.

**Optional:** How to Ace Calculus/How to Ace the Rest of Calculus by Adams et al. Calculus II is split between the two books (Calculus I is entirely in the first book), but used copies can generally be found for under $5 on Amazon.com.

**Course Description:** This course examines differential and integral calculus of functions of one variable, as follows. Topics include limits; continuity; derivatives; curve sketching; applications of the derivative; the definite integral; derivatives and integrals of trigonometric functions; and use of computer technology. Prerequisite Two years of high school algebra and trigonometry or Math 142.
Student Learning Outcomes

1. Students will demonstrate proficiency in the use of mathematics to structure their understanding of and investigate questions in the world around them.
2. Students will demonstrate proficiency in treating mathematical content at an appropriate level.
3. Students will demonstrate competence in the use of numerical, graphical, and algebraic representations.
4. Students will demonstrate the ability to interpret data, analyze graphical information, and communicate solutions in written and oral form.
5. Students will demonstrate proficiency in the use of mathematics to formulate and solve problems.
6. Students will demonstrate proficiency in using technology such as handheld calculators and computers to support their use of mathematics.

Student Assessment Outcomes

1. Critical Thinking: The above learning objectives will be assessed for critical thinking in labs and other classroom activities.
2. Written, Oral, & Visual Communication: Students will be assessed on written, oral, and visual communication skills on their quizzes, exams, labs, and lab jigsaw activities.
3. Empirical and quantitative reasoning: All assessments in this course will contain a quantitative reasoning and empirical computation component.

COURSE REQUIREMENTS

Course Activities

Labs: On Tuesdays we will work in small groups on activities that develop the central concepts in the course. Attendance and participation is especially crucial on these days. You will turn in individual write-ups of these labs activities. It is also important to ask questions of the other groups (who will generally work on related but slightly different problems than your own group) when they present as you will be responsible for all the problems on exams. Your two lowest lab grades will be dropped.

Prelabs/Postlabs: The purpose of these assignments is to help me determine where the class is at and how much time we should spend on a particular topic. Prelabs are expected to be completed before class, and postlabs will be completed at the end of class on Tuesday. These assignments will be graded on completion.

Attendance: There may be topics covered in class that are not in the text. You are responsible for all material covered. I don't take attendance, but there is a strong correlation between attendance and final grades. Missing class more than once or twice during the semester is likely to affect your grade, either directly or indirectly. If you do miss class, you should get notes and/or handouts from your classmates and see me during office hours.

Homework: There will be suggested problems assigned for each section. The answers to most of these problems are in the text, so I will not collect them. However, you will see some of these problems (verbatim or with slight variations) on tests, so completing the problems is strongly encouraged!

The key to success in this course is regularly working with other students in the class, doing the homework early and asking questions when you have them!!! We will discuss homework problems in class, but there will often not be enough time to discuss all
of them. Please come to office hours or visit the math tutoring lab if you have additional questions about the homework.

**Quizzes:** There will be 11 take home quizzes based upon the suggested homework problems throughout the semester. Your best 10 scores will count for your final grade.

**Exams:** We will have four in-class exams (roughly covering Chapters 1-5 & parts of 6), and a comprehensive final exam. The final exam will be a joint final with the other section of Calc II. The data and time is TBD at the moment. Make-up exams are possible only if there is a documented emergency.

**Workload and Assistance:** You should expect to spend 8 to 12 hours each week, outside of class, on the course material. This includes reading, homework, and studying for quizzes and exams. Some weeks (those in which an exam is scheduled, for instance) may require more of your time, other weeks may require less, but on average, budget 8 to 12 hours each week. I can’t stress enough that in order to be successful in this class you should spend much of this time working with other students in the class! Please ask questions and seek assistance as needed. You may email me at any time, and I encourage you to make use of my office hours.

**GRADING**

This class will be graded on a total points system. 1000 points are possible in the class. Assignments are weighted in the following manner:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Total Points Possible</th>
</tr>
</thead>
<tbody>
<tr>
<td>Best 12 Lab Write-ups</td>
<td>180</td>
</tr>
<tr>
<td>Reading Sheets, Pre-labs, Post-labs</td>
<td>50</td>
</tr>
<tr>
<td>Best 10 Quizzes</td>
<td>200</td>
</tr>
<tr>
<td>Tests</td>
<td>100 each, 400 total</td>
</tr>
<tr>
<td>Final</td>
<td>150</td>
</tr>
<tr>
<td>Professionalism</td>
<td>20 points</td>
</tr>
</tbody>
</table>

All point totals will be rounded to the nearest whole points before grades are assigned. Point ranges for final grades will be as follows:

- A: 900 – 1000 points
- B: 800 - 899 points
- C: 700 - 799 points
- D: 600 - 699 points
- F: 0 - 599 points

**TECHNOLOGY REQUIREMENTS**

Use of a graphing calculator having at least the capabilities of the TI-83 will be helpful throughout the course. TI-89 is highly recommended. A computer algebra system will be used for some problem exploration, enhanced conceptual understanding, and to engage students as active participants in the learning process.
COMMUNICATION AND SUPPORT

Interaction with Instructor Statement
My primary form of communication with the class will be through Email and Announcements. Any changes to the syllabus or other important information critical to the class will be disseminated to students in this way via your official University Email address available to me through MyLeo and in Announcements. It will be your responsibility to check your University Email and Announcements regularly.

Students who Email me outside of regular office hours can expect a reply within 24 hours M-F. Students who Email me during holidays or over the weekend should expect a reply by the end of the next regularly scheduled business day.

myLeo Support
Your myLeo email address is required to send and receive all student correspondence. Please email helpdesk@tamuc.edu or call us at 903-468-6000 with any questions about setting up your myLeo email account. You may also access information at https://leo.tamuc.edu.

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Course Specific Procedures

Academic Honesty
Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including (but not limited to) receiving a failing grade on the assignment, the possibility of failure in the course and dismissal from the University. Since dishonesty harms the individual, all students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced. In ALL instances, incidents of academic dishonesty will be reported to the Department Head. Please be aware that academic dishonesty includes (but is not limited to) cheating, plagiarism, and collusion.

Cheating is defined as:
- Copying another's test or assignment
- Communication with another during an exam or assignment (i.e. written, oral or otherwise)
- Giving or seeking aid from another when not permitted by the instructor
- Possessing or using unauthorized materials during the test
- Buying, using, stealing, transporting, or soliciting a test, draft of a test, or answer key

Plagiarism is defined as:
- Using someone else's work in your assignment without appropriate acknowledgement
- Making slight variations in the language and then failing to give credit to the source

Collusion is defined as:
• Collaborating with another, without authorization, when preparing an assignment
If you have any questions regarding academic dishonesty, ask. Otherwise, I will assume that
you have full knowledge of the academic dishonesty policy and agree to the conditions as
set forth in this syllabus.

Late Policy: Late work/Make-ups will not be accepted without a documentable and valid
excuse, because the lowest grade(s) in each category is dropped. Examples of
documentable and valid excuses include:
  * car accident w/ police report
  * illness w/ doctor’s note (you or your child)
  * athletic or other mandatory extra-curricular travel
  * field trip for another class
  * being detained upon entering the country by Homeland Security

University Specific Procedures

ADA Statement

Students with Disabilities
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides
comprehensive civil rights protection for persons with disabilities. Among other things, this
legislation requires that all students with disabilities be guaranteed a learning environment that
provides for reasonable accommodation of their disabilities. If you have a disability requiring an
accommodation, please contact:

Office of Student Disability Resources and Services
Texas A&M University-Commerce
Gee Library- Room 132
Phone (903) 886-5150 or (903) 886-5835
Fax (903) 468-8148
StudentDisabilityServices@tamuc.edu

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and
acceptable behavior conducive to a positive learning environment. (See Code of Student
Conduct from Student Guide Handbook).

COURSE OUTLINE / CALENDAR

WEEKLY SCHEDULE: 1). 1.4, 1.5, 1.6 7). 3.4, Test II 13). 6.3, 6.4, 1.7
2). 1.8, 2.1, 2.2 8). 3.5, 3.6, 3.7, 3.8 14). Test IV
3). 2.3, 2.4, 2.5 9). 3.9, 4.1 15). Review
4). Test I, 2.6 10). 4.2, Test III 16) FINAL WEEK
5). 2.7, 2.8, 2.9 11). 4.3, 4.4
6). 3.1, 3.2, 3.3 12). 4.5, 6.2
