**Instructional / Methods / Activities Assessments**

This course utilizes a practicum approach such as observations, small group/whole group instruction, co-teaching, and full-time teaching in the field. Seminars will be held weekly and uses an integrated approach to connect learning and experiences.

The purpose of the *internship/residency* within the field-based program is twofold: (1) to demonstrate knowledge about content, pedagogy, technology, classroom management, assessment and evaluation, and the teaching and learning process; and (2) to demonstrate the ability to work with and manage students, plan
lessons, and teach students using relevant and meaningful learning experiences in a professional manner. Thus, the assessment and evaluation is also twofold as it addresses performance in both field based and seminar settings.

The primary force in the CPDT is the **instructional leadership team** that is coordinated by the mentor teachers and university liaisons with input from the interns, residents, and principals. Most decisions about the activities and experiences each intern/resident will have are determined by the *ILT* through discussion and consensus. The ILTs are usually composed of at least two mentor teachers, usually from different grade levels or content areas, an intern, and/or a resident, and university liaison.

The field-based teacher education program has been designed to provide each student with opportunities to learn about students, learning, and teaching in the best possible environment—the real public school classroom and apply the knowledge gained from the resident semester in the residency semester. While the focus in the internship semester is on knowledge and learning, the focus in the residency semester is on demonstration and application of skills. Therefore, the intern’s responsibilities should include:

1. understand the physical and cultural environment of the school, faculty, and staff, and students;
