COURSE DESCRIPTION
The Cross-Cultural Design course was created in response to the growing demand for international designers who can bridge the creative cultural differences international marketing creates. This course will accept only those hand selected students with strong imaging skills, highly refined design sensitivities, and the ability to visualize concepts in a multi-cultural environment. Students will explore a variety of societal difference as well as the differences in their own creative approach when working with various cultures. They will be required to look beyond their traditional approach toward creative development and explore other means of developing ideas, visual approaches, color theories and messaging for the Chinese market.

COURSE OBJECTIVES
This course is an in-depth look at creativity across multiple cultures. Each student will gain an understanding of how to develop creative projects for societies that are outside of the designer’s cultural environment. Students will develop an awareness of societal distinctions and how these differences must be taken into consideration when designing for a foreign market. Objectives will include:

• Each student will gain an awareness of the cultural difference between societies and how these difference will affect their creative approach to design and concept development
• Students will gain a working knowledge in how to define the difference between their traditional approach to design and how that approach may differ in other cultures
• Gain knowledge on how to define these differences and apply them properly
• Create a well designed poster series that will successfully communicate within the country it will be distributed in
• Work directly with foreign creative partners in the development process
• Work proficiently in a team environment

COURSE STRUCTURE / EXPECTATIONS
This class will be a combination of lecture, readings, assignments, and class discussion. Outside class work will consist of readings, response essays for discussion, and assignments. This class is designed to be primarily a discussion class, which means that it is imperative that you come to class prepared to engage and contribute for positive outcome.

You are expected to perform at a consistently high, professional level throughout the semester. If there is anything that may keep you from performing at this level, you must contact the instructor immediately to discuss this issue.

GRADE EVALUATION
Your final grade will be based on an average of all assignments, attendance and an participation.
The participation grade is based on the following:
