CHEM 1105: SURVEY OF GENERAL CHEMISTRY LABORATORY
Summer II 2015

Course: CHEM 1105 is scheduled to meet Monday-Thursday from 2:00 PM to 5:50 PM in STC 308.
Instructor: Dr. Bukuo Ni
Office: Science Building 303
Office Hours: Monday-Thursday 11:00 AM to 12:00 Noon, other times by appointment.

Contact Information: Tel: (903) 886 - 5382; bukuo.ni@tamuc.edu

Text/Manual and other required material:
Supplies: a Safety goggle with side shields and a Padlock are a Must for the lab work (no exception); appropriate lab attire. Lab coat is optional on lab day.

Course Description
You must write down what you observe and measure during the time of the experiment. Compose the laboratory report in sufficient detail to allow someone else to report the experiment exactly. The observations section of the report must be the original notes taken during the course of the experiment (take detailed, legible notes during the experiment). You can also submit a typed version of your observations if you wish, but you Must submit your original notes taken during the experiment.

Each laboratory report will consist of the following sections
Prelab Section—40 points (due at the beginning of the laboratory)
A. Title–2 points  
B. Objective – 3 points  
C. Procedure–15 points  
D. Physical Constants/Reagent Data–10 points  
E. Safety–5 points  
F. Stoichiometry/Theory–5 points

Post lab Section–60 points (Must be completed by the beginning of the next laboratory period).
A. Modifications to procedure–5 points
B. Observations–15 points (this sections should be your notes of observations that you make DURING the course of the experiment)
C. Results–20 points
D. Discussion–20 points

Student Learning Outcomes
By the end of the semester I intend my students to have realized a number of objectives.
(1) All students must be able to readily identify glassware commonly used in the chemistry laboratory and know how to properly utilize the glassware.
(2) Learn basic chemistry techniques, such as how to calculate percent yields, how to properly use measuring devices, how to properly clean glassware at the end of an experiment.

(3) Learn the safety requirements and methods needed to work in a chemistry laboratory. Learn how to safely handle, utilize and dispose of chemicals.

(4) Learn how to document laboratory experiments, how to maintain a scientific notebook.

(5) Communication in the form of laboratory reports will be clear, purposeful, and make appropriate use of evidence, data and technology as applicable.

(6) In laboratory experiments, you should be able to individually and within a team with fellow classmates, conduct laboratory experiments, critically analyze data, draw conclusions from the data, and clearly and concisely report the observations and conclusions drawn from the laboratory experiments.

(7) Students will develop and execute effective processes for completing tasks.

(8) Students will be able to interpret, test and demonstrate principles revealed in empirical data.

(9) Students will be able to work together toward a shared purpose relevant to the course or discipline with a sense of shared responsibility for meeting that purpose.

**Lab Cleanliness**
You will be expected to maintain a clean and orderly lab. At the end of every experiment, your bench space and hood space must be cleaned. Any equipment utilized during the experiment must be cleaned as well (balances, rotovaps, etc.). You should ensure that sinks and floors are also clean. If the lab space and equipment that you utilized during the experiment is left dirty and unorganized, you will be penalized 20% on your lab report. The lab report has to be typed for grading.

**Grading/Evaluation**
The grade for this course will be derived as follows:

Cleanliness and Behavior: 10% of total grade.

Pre-lab: 35% of total grade.

Post lab report: 55% of total grade.

You are required to submit Data and Post Lab/Lab Report in a timely manner. You will incur a 10% penalty for every day that your lab report is late; thus, if a lab report is 10 days late, you will receive a zero for that report. There will be absolutely no make-ups for laboratory experiments. If you miss a laboratory experiment that will be your dropped laboratory write-up. If you miss more than one laboratory experiment, you will be assigned a grade of zero for that assignment. **The last drop date for the course is August 3 with Q grade.** Grading will be based on a standard percentage scale: 100-90 = A; 89-80 = B; 79-70 = C; 69-60 = D; 59-below =F. Dishonest scholarship will earn an automatic zero (0) and initiate prosecution to the fullest extent. Incomplete grades may be given only if the student has a current average above 70% and is precluded from completion of the course by a documented illness or family crisis.
Attendance and Class Participation
All students are expected to attend classes on a regular basis and attendance will be
recorded. The Department of Chemistry adheres to the attendance policy set by the
University as stated in the most current Undergraduate Catalog. Being late by more than
5 minutes is equivalent to missing a lecture. Excessive absence will be reported to the
Dean of the College and Dean of students. In addition, according to the TAMU-
Commerce Procedure A13.02, Good class attendance will be necessary in order to pass
this course.

Student Conduct Policy:
In order to create a “learning environment” free of disruption, you MUST TURN OFF
your cell phones, MP3 players, PDA’s, Pagers, and any other electronic devices before
entering the class. Students are expected to comply with the student code of conduct as
stated Student’s Guidebook, Policies and Procedures, Conduct. If the student is failed to
comply with the code of conduct and being disrespectful, disruptive to the instructor or
the students of the class, the instructor reserves the right to dismiss the student from the
class on the first offense. A second offense may constitute dismissal from the course with
a failing grade. A and M-Commerce will comply in the classroom, and in online courses,
with all federal and state laws prohibiting discrimination and related retaliation on the
basis of race, color, religion, sex, national origin, disability, age, genetic information or
veteran status. Further, an environment free from discrimination on the basis of sexual
orientation, gender identity expression will be maintained.

Academic Integrity and Honesty Policy:
Academic cheating, plagiarism, and other forms of academic misconduct may result in
removal of the student from class with a failing grade or may in extreme cases result in
suspension or expulsion from the University as described in the Code of Student Conduct
section of the Student1s Guidebook A&M-Commerce Procedure 13.99.99.R0.10

Students with Disabilities
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that
provides comprehensive civil rights protection for persons with disabilities. Among other
things, this legislation requires that all students with disabilities be guaranteed a learning
environment that provides for reasonable accommodation of their disabilities. If you have
a disability requiring an accommodation, please contact:
