Course Description:

The relations among social classes are examined as systems of privilege with inequalities of wealth, power, and prestige among individuals and groups. Student Learning Outcomes:

This course is intended to enable you to:

- To understand the major sociological explanations for social inequality, both within the United States and globally;

- To recognize what practices and institutions shape these diverse social groupings;

- To enable you to apply the course material to your real life experiences;

- To compare and contrast the popular public perception of inequality with an academic and intellectual analysis of inequality.
