2. **Midterm Exam:** There will be a multiple choice midterm examination.

3. **Personal Assessment Paper:** In this paper, you will evaluate your own potential to effectively perform crisis intervention counseling. Your paper needs to reflect accurate knowledge of effective crisis worker characteristics and the dynamics of counselor burnout, vicarious traumatization, and compassion fatigue. You will utilize the course readings, and at least 3 professional journal articles dealing with counselor burnout, vicarious traumatization, or compassion fatigue as references. Approximate length of 5 pages is suggested. *Guidelines for this paper are included in the syllabus.*

You may choose a topic that has been covered class, and cover it in greater depth. Or you may choose a topic that has not been covered in class. You will cite and *synthesize* information from the related literature. Minimum length is 10 pages, typed and double-spaced using APA style. Your literature review *must* include at least 10 professional journal articles; it may also include chapters from books on your topic, as well as relevant online resources. *Guidelines for this paper are included in the syllabus.*

Objective: To evaluate your own potential to effectively perform crisis intervention counseling.

In this approximately 5 page paper, you will identify and discuss personal attitudes, values, behaviors, and experiences that can impede or enhance your ability to do crisis work. Your paper must reflect accurate knowledge of effective crisis worker characteristics and the dynamics of counselor burnout, vicarious traumatization, and compassion fatigue. You will use the course readings, and at least 3 professional journal articles dealing with counselor burnout, vicarious traumatization, or compassion fatigue as references. Cite all references, using APA format.

To prepare to write this paper, you will need to do the following:

1. Read Chapter 15 in the James text: Human Service Workers in Crisis: Burnout, Vicarious Traumatization, and Compassion Fatigue. We will not be covering this chapter in class.

2. Think about the topics we have read about and discussed in class so far.

3. Look ahead and give some thought to the topics we’ll be addressing throughout the rest of the semester: PTSD, suicide, sexual assault, domestic violence, grief and loss.

In preparing to write your paper, consider the following:

What personal qualities or characteristics might enhance your ability to be an effective crisis worker?

What personal qualities or characteristics might impede your ability to be an effective crisis worker?

How might crisis experiences in your own life increase the potential for countertransference when working with clients who have experienced similar forms of trauma and crisis?

What steps might you take to lessen the potential for and therefore manage countertransference in these situations?

What attitudes, values, behaviors, and experiences might contribute to your risk for vicarious traumatization or compassion fatigue?

What feelings, attitudes, motives, and/or expectations might increase your risk for burnout?

What are some preventative and restorative measures for burnout that are a good match for your particular needs?

**Remember that this self-assessment must be informed by the course readings and at least three professional journal articles dealing with this topic.
LITERATURE REVIEW

You will identify a crisis intervention topic of particular interest to you, and of particular relevance to the work setting and the clientele you intend serve as a professional counselor. You may choose a topic that has been covered class, and cover it in greater depth. Or you may choose a topic that has not been covered in class.

Begin your review of the literature with background information about the crisis intervention topic. Then focus your review on the specific population you are interested in. That is, rather than attempting to cover everything there is to know about a crisis intervention topic (e.g., grief and loss; sexual violence), you need to focus your topic (e.g., bereavement grief in elementary school age children; sexual violence prevention/intervention for adolescent girls). This focused discussion is the heart of your paper.

You will cite and *synthesize* information from the related literature. Include an in-depth description of initial crisis reactions, and issues/problems associated with the crisis. Identify and describe programs (e.g., psychoeducational curricula such as the Duluth Model for domestic violence; anti-bullying guidance programs), recommended approaches, interventions, and techniques.

Minimum length is 10 pages, typed and double-spaced using APA style. Your literature review must include at least 10 professional journal articles; it may also include chapters from books on your topic, as well as relevant online resources.

**Literature review guidelines (minimum 10 pages):**

Does it document this as a widespread problem?

Does it describe the key elements of the topic?

Does it identify and describe initial crisis reactions, and the most important issues/problems associated with the crisis?

Does it identify solutions discovered by others (e.g., programs, approaches, interventions, and techniques)?

Does it review *at least* 10 recent journal articles?
