COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings:

Textbook(s) Required: None

Course Description:
This course is designed to introduce the student to the basic concepts and skills utilized in horticulture. Students will receive an introduction to basic botanical concepts such as morphology, anatomy, taxonomy, physiology, genetics, and propagation as they apply to horticulture.

Student Learning Outcomes:
1. Students will demonstrate an understanding of and be able to communicate well concerning basic botanical concepts such as plant taxonomy, morphology, anatomy, physiology, mineral nutrition, reproduction, and genetics as they apply to horticultural crops.
2. Students will recognize plant responses to changing environmental conditions, such as drought, heat, cold, and changes in light (blue-light responses, red-light responses, photoperiodism)
3. Acquaint the student with the broad field of horticulture including greenhouse and nursery crops, ornamental horticulture, pomology, and olericulture.
4. Students will be able to analyze, evaluate, or solve problems when given a set of circumstances or data.
5. Student communication will be clear, purposeful, and make appropriate use of evidence, data and technology where applicable.
6. Students will be able to interpret, test, and demonstrate principles revealed in empirical data.
7. Students will be able to engage with peers in a project that demonstrates their understanding of relevant course theories and concepts.
