Psy 322 Lifespan Development
Online section 01W 41495
Course meets 6/1/2020 through 7/2/2020
COURSE SYLLABUS summer 2020

The syllabus and schedule are subject to change.

INSTRUCTOR INFORMATION

Instructor: William G. Masten, PhD, Associate Professor
Office Location: 209 Henderson, TAMUC campus, Commerce, TX 75429
Office Hours: 3:00 pm 5:30 pm Tuesday & Thursday
Office fax 903 886 5510, Department phone 886 5594

Hello
I am excited about this new semester and the additional students that I will meet over the Internet. I encourage you to view the Units and the syllabus to know the class content, quizzes, discussions, Essays and course requirements. You should go ahead and begin the first assignment. I will be responding to questions sent to my email (william.masten@tamuc.edu).

University Email Address: william.masten@tamuc.edu
Preferred Form of Communication: email
Communication Response Time: 48 hours.

COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings. In May I checked on line and this is what I found.

Contents
Chapter 1 Basic Concepts and Methods
Chapter 2 Theories of Development
Chapter 3 Prenatal Development and Birth
Chapter 4 Physical, Sensory, and Perceptual Development in Infancy
Chapter 5 Cognitive Development in Infancy

The syllabus and schedule are subject to change.
Chapter 6 Social and Personality Development in Infancy
Chapter 7 Physical and Cognitive Development in Early Childhood
Chapter 8 Social and Personality Development in Early Childhood
Chapter 9 Physical and Cognitive Development in Middle Childhood
Chapter 10 Social and Personality Development in Middle Childhood
Chapter 11 Physical and Cognitive Development in Adolescence
Chapter 12 Social and Personality Development in Adolescence
Chapter 13 Physical and Cognitive Development in Early Adulthood
Chapter 14 Social and Personality Development in Early Adulthood
Chapter 15 Physical and Cognitive Development in Middle Adulthood
Chapter 16 Social and Personality Development in Middle Adulthood
Chapter 17 Physical and Cognitive Development in Late Adulthood
Chapter 18 Social and Personality Development in Late Adulthood
Chapter 19 Death, Dying, and Bereavement

**Student Learning Outcomes (Learning Objectives)**

Learning Objectives for Quality Enhancement Plan (QEP)
The Quality Enhancement Plan (QEP), for the University is Preparing Students for an Interconnected World.

Learning Outcome 1: Students will be able to demonstrate knowledge of the interconnectedness of global dynamics (issues, processes, trends, and systems).
Learning Outcome 2: Students will be able to apply knowledge of the interconnectedness of global dynamics.
Learning Outcome 3: Students will be able to view themselves as engaged citizens within an interconnected and diverse world.

**Development:**
(1) Identify stages and developmental characteristics of student (includes cognitive, social, emotional, and physical development).
(2) Interpret the interrelationships among cognitive, social, emotional, and physical development in students

**Cultural Diversity:**
(1) Describe the effect of ethnicity on development.
(2) Describe the advantages of bilingual education.

**Psy 322 Course Description**
The course follows the lifespan development of the individual, emphasizing the theoretical and experimental approaches to the study of cognitive, personality, social, perceptual, and physical components of development from conception to death. This course is designed to provide the student with information about the application of development of children and adolescents.

**People First Language**
In special education, general education, and psychology, it is important to refer to individuals who have a disability (or a D.S.M. diagnosis) in "people first" language as described in the federal special education law, I.D.E.A. 2004. We do this to focus on the individual first, not the disability. Always refer to the person first, and the disability second. For example, you would **not** discuss a person as “an ADHD student,” but as “a student with ADHD”

**Diagnosis in Education & Special Education**
We will follow the federal special education law IDEA 2004, to guide our use of use of the various diagnoses in special education. Some individuals do not like this however, I did not write the law! We will follow IDEA to avoid confusion. For example, IDEA uses autism, not autism spectrum disorder.
**Required assignments**
Read and learn all chapters 1-19, study the PowerPoints, study all documents under doc sharing, and complete all assignments.

**COURSE REQUIREMENTS**

*Minimal Technical Skills Needed*
Using the learning management system, using Microsoft Word, PowerPoint, & using PsycINFO.

*Instructional Methods*

*Delivery modalities:* lectures, readings, course structure, PowerPoints

*Types of learning activities:* reading, lectures, in-class activities,

*Assessments:* Discussions, Essays, 2 quizzes.

*Required assignments:* Discussions, essays, Read and know **Chapters** 1 to 19 and the associated PowerPoints.

**Notice:** Online versions of this course have the same requirements regardless of the semester offered. I reserve the right to add to or change this syllabus.

**Important Announcement**
Almost every semester I hear from students who paid attention to what other students say in regard to important elements of courses, example course test dates, assignments, etc. a very bad idea. Last semester one student paid attention when another student said a test was not open. Following this wrong information cost her dearly.

All quizzes in this course are timed. If you are a “slow reader” or have other problems taking tests; there is assistance on campus. Be sure contact

Office of Student Disability Resources and Services or call Trio at 903-886-5833 or the

Community Counseling & Psychology Clinic (903) 886-5660 or the

Texas A&M University-Commerce Counseling Center, Student Services Building, Room 204, Phone: 903-886-5145.

**Software Required:** Word, PowerPoint

**Optional Texts and/or Materials:** none apart from those articles under Doc Sharing

**Student Responsibilities or Tips for Success in the Course**
All students should attend class; amount of weekly study is 10 hours.

**Study Recommendations:**
1. Study the syllabus, read the book. Remember **Murphy's Law:** "Anything that can go wrong will go wrong."

**GRADING**
Final grades in this course will be based on the average of all scores using the following scale:

A = 90%-100%
B = 80%-89%
C = 70%-79%
D = 60%-69%
F = 59% or Below

**Essays, Quizzes & Discussions**

---

The syllabus and schedule are subject to change.
There are 7 Discussions worth 10 points each for 70 points, 22% of final grade
There are 2 Essays worth 25 points each for 50 points, 16% of final grade
There are 2 Quizzes, worth 100 points each 200 points, 62% of final grade
320 total points = 100%

Unit 1 Assignments (these assignments will be covered in Unit 8 quiz)

You do not need to demonstrate to me you completed the assignments below in Unit 1. However, they will be covered in Unit 8 quiz. In addition, you will need articles from PsycINFO as references for your Assignment Essays.

The syllabus and schedule are subject to change.
Searching with PsycINFO

Once you finish the tutorials, go to the tamuc web site,
Click on Resources
Then below library, click on Gee library.

Click on Find Then on Database,

Then search by title or subject, click on P

Click on Search by Name,
Type in PsycINFO,
Then click search,

Below a window will open up under Resource PsycINFO
Click on PsycINFO.
If you are off campus, you will see Proxy Login (enter your user ID and password)
When you get to PsycINFO, do a search following these steps:

Click on advance search
Click on Thesaurus (at the top of the page)
Each time you do a search you must start with a word from the thesaurus

Enter the word “special education” to the Thesaurus. Then click on browse.

Scroll to the term “special education.”
Put a check mark (☑) next to special education
Click “add”

In the Thesaurus, put the term Latinos/Latinas
Put a check mark (☑) next to Latinos/Latinas

Select term Latinos/Latinas, then search using and click on and
This means your search with use the terms special education AND Latinos/Latinas
Then Search with the terms special education and Latinos/Latinas

On left hand side, under source type, click on Academic Journals.
When you put a check mark☑, your search is automatically reduced to journal articles. Now you have chosen only journal articles. Books and dissertations have been eliminated from your search.

Select the first 2 journal articles, put them in the folder.
Go to folder view

Select all

Then click “save as file”

Under Include when saving:

Leave HTML link to article not checked

Standard Field Format: brief citation (click)

Citation Format: APA (American Psychological Assoc.) (Click). Now the citations are in APA style
Click save
Copy and use the first 2 journal articles. 
Read and learn: Magazine or Scholarly Journal (below) and

**Distinguishing Scholarly from Non-Scholarly Periodicals** at 
http://guides.library.cornell.edu/c.php?g=31867&p=201758 (will open in a new window)

**Magazine or Scholarly Journal**
There are several types of periodicals found in academic library collections. Knowing something about the characteristics of each type—popular or scholarly—will help in identifying the appropriate type of periodical titles.

### POPULAR PERIODICALS
Tend to have short articles (1-5 pages)  
Cover a variety of topic/subject areas (Time, The New Yorker, and National Review). They may also cover a single subject area with the intention of informing or entertaining the readership (Sports Illustrated or Audubon).  
Contain articles that do not contain a bibliography or cited reference page. The reader cannot check the author's information by tracking down and reading the original information source.  
Intended for a non-academic, non-specialized audience.  
Use conventional/conversational language, as opposed to a specialized vocabulary.  
Provide articles written by journalists, rather than researchers or specialists in a given field.  
Provide articles often accompanied by photographs or other illustrations.  
Include extensive commercial advertising.  
Issued frequently (i.e. come out weekly, bi-weekly or monthly).  
Are sometimes in newspaper format.

### SCHOLARLY PERIODICALS
Include lengthy articles (five to fifty+ pages) which contain original research or results of a study done in a specific subject area (e.g. music theory, psychology, medicine).  
Contain articles with footnotes or cited reference pages. The cited references allow the reader to consult the same material that the author used in his/her research.  
Intended for an academic or scholarly audience and use technical or specialized vocabulary.  
Publish articles written by scholars, specialists, or researchers in the field (as opposed to articles written by journalists reporting on or synthesizing research).  
Publish reviews of the literature.  
Include articles with charts or tables: news photos and other types of graphics are often not used except in the case of articles on visual subjects such as art, design, or architecture.  
Produced under the editorial supervision of a professional association (e.g. Journal of the American Medical Association) or by a scholarly press (e.g. University of Washington Press).  
Contain little or no advertising or photographs.  
Issued less frequently than magazines (i.e. two to twelve times per year).

---

**Discussions**

**Grading of Discussions**
Two posts = 10 points; 1 post = 5 points, 0 posts = 0 points.

**Unit 1 Discussion:** Why is Plagiarism something to be avoided at all costs? (see Plagiarism tutorial http://www2.umf.maine.edu/plagiarism/) What is your position on this issue? For full credit on all Discussions, give your opinion and comment on another student's post. Do not say you agree or disagree with someone. Instead, give the logic of reacting to others’ ideas and demonstrate your critical thinking in your all Discussion comments.
Please, follow the rules of internet etiquette for all called Rules of Netiquette. The Core Rules of Netiquette — Summary
Rule 1. Remember the human. Never forget that the person reading your mail or posting is, indeed, a person, with feelings that can be hurt. ...
Rule 2. Adhere to the same standards of behavior online that you follow in real life. ...
Rule 3. Know where you are in cyberspace. ...
Rule 4. Respect other people's time and bandwidth. To obtain the maximum points respond to at least one other student. A grade will be assigned for participation in the discussions for each Unit. You must participate/post in each discussion thread/activity to receive credit.

Unit 2 Discussion
Homo sapiens are from 100,000 to 200,000 years old (depending on the research you read). All of our ancestors lived in Africa. About 50,000 years ago a small band left Africa. Our ancestors ended up living all over the world. After watching the Journey of Man: A Genetic Odyssey (2003), https://www.youtube.com/playlist?list=PL895E779F2D722DAF respond to this quote from Spencer Wells: “You and I, in fact everyone all over the world, we’re literally African under the skin; brothers and sisters separated by a mere two thousand generations. Old-fashioned concepts of race are not only socially divisive, but scientifically wrong. It's only when we've fully taken this onboard, that we can say with any conviction that the journey our ancestors launched all those years ago, is complete." What is your position on this issue? For full credit on all Discussions, give your opinion and comment on another student's post. To obtain the maximum points do not say you agree or disagree with others' comments. Instead, give the logic of reacting to others' ideas and demonstrate your critical thinking in your Discussion comments. To obtain the maximum points respond to at least one other student.

Unit 6 Discussion
Corporal punishment is a form of physical punishment to get children to abandon undesirable behavior. Punishment involves the deliberate infliction of pain in order to get a child to abandon undesirable behavior. This includes physical chastisement such as spanking, or paddling of minors by parents, guardians, or school personnel. Punishment is not always successful to curve undesirable behavior. In addition, punishment does not teach students to exhibit desirable behavior, yet parents feel the need to use it. Discussion question: Should Corporal punishment be used with children ages 6 to 12 years?

Unit 8 Discussion
What are the advantages and disadvantages of growing up bilingual? Will you want your children to grow up bilingual?

Unit 10 Discussion
Should public schools have bilingual instruction? What is your position on this issue? To obtain the maximum points respond to at least one other student. To obtain the maximum points, do not say you agree or disagree with others’ comments. Instead give the logic of reacting to others’ ideas and demonstrate your critical thinking in your Discussion comments.

The syllabus and schedule are subject to change.
Unit 12 Discussion

Racism is defined as: a belief or doctrine that inherent differences among the various human racial groups determine cultural or individual achievement, usually involving the idea that one’s own race is superior and has the right to dominate others or that a particular racial group is inferior to the others. Discussion questions: Is racism present in American society? What is your opinion on this issue? To obtain the maximum points respond to at least one other student. Do not say you agree or disagree with others’ comments. Instead give the logic of reacting to others’ ideas and demonstrate your critical thinking in your Discussion comments.

Unit 14 Discussion

Some students seem to be popular among classmates while others seem to be social outsiders. Should parents intervene when they see their children being treated as outsiders? To obtain the maximum points respond to at least one other student. To obtain the maximum points do not say you agree or disagree with others’ comments. Instead give the logic of reacting to others’ ideas and demonstrate your critical thinking in your Discussion comments.

Assignment Essays

Unit 8 Assignment Essay: Explain why it is best to introduce children to a second language in the first year of life. Cite relevant research to support your explanation. Create (at least) a 200-essay (at least 2 in text citations and 2 references). Put your essay in 1 file under Unit 8 Assignment. No use of direct or verbatim quotes longer than 3 consecutive words, no use of websites as references. References must be journal articles or books (our text) obtained from PsycINFO. No use of sources from Google, blogs, websites, dissertations, thesis, PowerPoint, newspapers, or popular magazines as references. Use of these as references equals a score of 0. Do not include your personal story, personal history, experiences, feelings, etc. in any Essay. Save these for the Discussions.

Checklist for grading all essays (put x if present)

- Completed PsycINFO search related to topic
- Included 2 in text citations
- Essay has 2 references in APA style
- No use of Psychology Today, or Ladies Home Journal type popular magazines
- References are books or journal articles obtained from PsycINFO
- No use of websites, blogs, PowerPoint, Facebook, etc. as references
- No direct quotes longer than three consecutive words
- Essay alone (minus references) = 200 words
- No misspelled words

Unit 10 Assignment: QEP Global Citizen Essay: The purpose of this question is to increase your ability to see yourself as a global citizen, using the Learning Outcome 3 (Students will be able to view themselves as engaged citizens within an interconnected and diverse world). Using the terms Global Citizen (or other related terms) and characteristics find (at least) 2 journal articles from PsycINFO EBSCO, (otherwise the essay is a zero), that include (at least) 4 characteristics of a Global Citizen. List these 4 characteristics include the references where you found the characteristics. Then create (at least) a 200-essay (including the 4 characteristics) on why people are global citizens (at least 2 in text citations and 2 references). Put your essay in 1 file under Unit 10 Assignment. No use of direct or verbatim quotes longer than 3 consecutive words, no use of websites as references. References must be obtained from PsycINFO. No use of sources from Google, blogs, websites, dissertations, thesis, PowerPoint, newspapers, or popular magazines as references. Use of these as references equals a score of 0. Do not include your personal story, personal history, experiences, feelings, etc. in any Essay. Save these for the Discussions.

Possible sources for your essay (from PsycINFO).

**Due dates**

Each Unit's Assignment Essays, Quizzes and Discussions are due at 11:59 pm on the due date. All assignments must be posted to D2L, sending it in an email attachment is not acceptable. **No Assignments or Discussions will be accepted after 12/1/2020.**

Assignments in this course will include Readings, Quizzes, 3 Assignment Essays and 14 Discussions. There will be 2 multiple choice quizzes.

The syllabus and schedule are subject to change.
No Assignments or Discussions will be accepted after 7/1/20

Each Unit’s tasks are due at 11:59 pm on the due date. Assignments in this course will include Readings, Quizzes, Assignment Essays and Discussions. There will be 2 multiple choice quizzes.

Due dates
Each Unit’s Assignment Essays, Quizzes and Discussions are due at 11:59 pm on the due date. All assignments must be posted to D2L, sending it in an email attachment is not acceptable.

Tentative due dates subject to change

Assignment Essays
Each Assignment Essay requires at least 200 words, at least 2 in text citations, and at least 2 references obtained from PsycINFO. References may include our textbook and journal articles. Any use of direct quotes longer than 3 consecutive words in an Assignment Essay, will gain the user a grade of 0.

Assignment Essays require facts supported by references. Therefore, do not give your personal opinion, experience, philosophy, etc.

Save your opinions (experience, philosophy, etc.) for the Discussions. Discussions are specifically designed for you to give your personal opinions.

No use of direct quotes longer than 3 consecutive words in any Assignment Essay. Quotes longer than 3 consecutive words will gain the user a grade of 0. Do not use direct quotes longer than 3 consecutive words.

COMMUNICATION AND SUPPORT

Interaction with Instructor Statement
Communicate with the instructor via email and during the semester expect a response within 48 hours.

University Specific Procedures: Student Conduct
All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the Student Guidebook.

Students should also consult the Rules of Netiquette for more information regarding how to interact with students in an online forum: Netiquette http://www.albion.com/netiquette/corerules.html

Conduct:
The following are illustrations of misconduct by individuals or groups, which may result in review by the appropriate disciplinary agencies:

Academic cheating and plagiarism.
Malicious destruction, damage, unauthorized possession, or misuse of University property, including library and laboratory materials, or of private property on the campus.
Abuse, whether physical, mental, or otherwise, of another person in the University community.
Disorderly conduct, which inhibits or interferes with the educational responsibility of the University community or the University’s social-educational activities.
Violation of local, state, and federal laws on or off campus.
Recurring incidents, which are in violation of University policies, and/or other such persistently irresponsible behavior that brings into question the student’s serious intent to pursue an education.
Failure to respond to a summons by letter, telephone call, E-mail, or personal messenger from a University administrative official or faculty member.
Sexual or racial harassment.

TAMUC Attendance
For more information about the attendance policy please visit the Attendance webpage and Procedure 13.99.99.R0.01.
http://www.tamuc.edu/admissions/registrar/generalInformation/attendance.aspx
Academic Integrity
Students at Texas A&M University-Commerce are expected to maintain high standards of integrity and honesty in all of their scholastic work. For more details and the definition of academic dishonesty see the following procedures:

Undergraduate Academic Dishonesty 13.99.99.R0.03
Graduate Student Academic Dishonesty 13.99.99.R0.10
http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/graduate/13.99.99.R0.10GraduateStudentAcademicDishonesty.pdf

Academic Misconduct
If I detect academic misconduct, you may FAIL this course.

On independent work
Everything you do in this course is completed without the aid of others. You may not have aid on quizzes. You may not use books, notes or other help on the quizzes.

Honesty and Plagiarism:
Plagiarism
Instructors do not tolerate plagiarism and other forms of academic dishonesty. Students are expected to uphold and support the highest academic standards. Penalties for students guilty of academic dishonesty are listed in the Student Code of Conduct (Texas A&M University-Commerce Code of Student Conduct). If it is determined you committed plagiarism or cheating may get you an F in this course.

Cheating is the willful giving or receiving of information in an unauthorized manner during an examination, illicitly obtaining examination questions in advance, unauthorized copying of computer or Internet files, using someone else's work for the assignments and presenting it as if it were one's own, copying test items, printing test items or saving test items, or any other dishonest means of attempting to fulfill the requirements of a course. You may not open, view, download, save or use another student’s files or your work from another course. If you do this is cheating and will fail this course.

Collusion is intentionally aiding or attempting to aid another in an act of scholastic dishonesty, including but not limited to, providing a paper or project to another student; providing an inappropriate level of assistance; communicating answers to a classmate during an examination; removing tests or answer sheets from a test site, or allowing a classmate to copy answers.

Students with Disabilities-- ADA Statement
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact: Office of Student Disability Resources and Services Texas A&M University-Commerce Gee Library- Room 162 Phone (903) 886-5150 or (903) 886-5835 Fax (903) 468-8148 Email: studentdisabilityservices@tamuc.edu Website: Office of Student Disability Resources and Services http://www.tamuc.edu/campusLife/campusServices/studentDisabilityResourcesAndServices/Nondiscrimination Notice Texas A&M University-Commerce will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity, or gender expression will be maintained.

http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/13students/academic/13.99.99.R0.01.pdf

The syllabus and schedule are subject to change.
Campus Concealed Carry Statement Texas Senate Bill - 11 (Government Code 411.2031, et al.) authorizes the carrying of a concealed handgun in Texas A&M University-Commerce buildings only by persons who have been issued and are in possession of a Texas License to Carry a Handgun. Qualified law enforcement officers or those who are otherwise authorized to carry a concealed handgun in the State of Texas are also permitted to do so. Pursuant to Penal Code (PC) 46.035 and A&M-Commerce Rule 34.06.02.R1, license holders may not carry a concealed handgun in restricted locations. For a list of locations, please refer to the Carrying Concealed Handguns on Campus document and/or consult your event organizer. Web url: http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/34SafetyOfEmployeesAndStudents/34.06.02.R1.pdf Pursuant to PC 46.035, the open carrying of handguns is prohibited on all A&M Commerce campuses. Report violations to the University Police Department at 903- 886-5868 or 9-1-1.

Study guide

Ch. 1
STUDY GUIDE QUESTIONS
After completing Chapter 1, students should be able to answer the following questions:
1.1 What ideas about development were proposed by early philosophers and scientists?
1. What is the lifespan perspective?
1. What major domains and periods do developmental scientists use to organize their discussions of the human lifespan?
1. How do developmentalists view the two sides of the nature–nurture debate?
1. What is the continuity–discontinuity debate?
1. How do the three kinds of age-related change differ?
1. How does consideration of the contexts in which change occurs improve scientists' understanding of human development?
1. What are the goals of scientists who study human development?
1.9 What descriptive methods do developmental scientists use?
1.10 What is the primary advantage of the experimental method?
1.11 What are the pros and cons of cross-sectional, longitudinal, and sequential research designs?
1. Why is cross-cultural research important to the study of human development?
1.1 What are the ethical standards that developmental researchers must follow?

KEY TERMS
ageism human development physical domain
atypical development independent variable population
case study laboratory observation qualitative change
cognitive domain lifespan perspective quantitative change
cohort effects longitudinal design representative sample
critical period nature–nurture debate sensitive period
cross-sectional design nonnormative changes sequential design
dependent variable norm-referenced tests social clock
ethnography normative age-graded changes social domain
experiment normative history-graded changes stages
experimental group norms survey

Ch. 2
STUDY GUIDE QUESTIONS
After completing Chapter 2, students should be able to answer the following questions:
2.1 What are the main ideas of Freud's psychosexual theory?
2.2 What is the conflict associated with each of Erikson's psychological stages?
2.3 What are the strengths and weaknesses of psychoanalytic theory?
2.4 How did Watson condition Little Albert to fear white, furry objects?
2.5 How does operant conditioning occur?
The syllabus and schedule are subject to change.

2.6 In what ways does social-cognitive theory differ from other learning theories?
2.7 How do the learning theories explain development?
2.8 How does cognitive development progress, according to Piaget?
2.9 How did Vygotsky use the concepts of scaffolding and the zone of proximal development to explain cognitive development?
2.10 How does information-processing theory explain the findings of developmental psychologists such as Piaget and Vygotsky?
2.11 What are some of the important contributions of the cognitive theories?
2.12 How do behavior geneticists explain individual differences?
2.13 What kinds of behaviors are of interest to ethologists and sociobiologists?
2.14 What is the main idea of Bronfenbrenner’s bioecological theory?
2.15 What assumptions do the three families of theories make about development?
2.16 On what criteria do developmentalists compare the usefulness of theories?
2.17 What is eclecticism?

KEY TERMS

accommodation learning theories
assimilation neo-Piagetian theory
behavior genetics observational learning, or modeling
behaviorism operant conditioning
biocultural theory psychoanalytic theories
classical conditioning psychosexual stages

cognitive theories psychosocial stages
eclecticism punishment
ego reinforcement

equilibriation scheme
ethology sociobiology
extinction 1 sociocultural theory
id superego
information-processing theory

Ch. 3

LEARNING OBJECTIVES

After completing Chapter 3, students should be able to answer the following Study Guide Questions:
3.1 What are the characteristics of the zygote?
3.2 In what ways do genes influence development?
3.3 What are the effects of the major dominant, recessive, and sex-linked diseases?
3.4 How do trisomies and other disorders of the autosomes and sex chromosomes affect development?
3.5 What are the characteristics of each trimester of pregnancy?
3.6 What happens in each stage of prenatal development?
3.7 How do male and female fetuses differ?
3.8 What behaviors have scientists observed in fetuses?
3.9 How do teratogens affect prenatal development?
3.10 What are the potential adverse effects of tobacco, alcohol, and other drugs on prenatal development?
3.11 What risks are associated with teratogenic maternal diseases?
3.12 What other maternal factors influence prenatal development?
3.13 How do physicians assess and manage fetal health?
3.14 What kinds of birth choices are available to expectant parents?
3.15 What happens in each of the three stages of labor?
3.16 What do physicians learn about a newborn from the Apgar and Brazelton scales?
3.17 Which infants are categorized as low birth weight and what risks are associated with this status?

KEY TERMS

amnion gonads

The syllabus and schedule are subject to change.
The syllabus and schedule are subject to change.

**STUDY GUIDE QUESTIONS**

After completing Chapter 4, students should be able to answer the following questions:

4.1 What important changes in the brain take place during infancy?

4.2 How do infants' reflexes and behavioral states change?

4.3 How do infants' bodies change, and what is the typical pattern of motor skills development in the first years?

4.4 What are the nutritional needs of infants?

4.5 How does malnutrition affect infants' development?

4.6 What are infants' health-care and immunization needs?

4.7 What have researchers learned about sudden infant death syndrome?

4.8 How do infant mortality rates vary across groups?

4.9 How do infants' visual abilities change across the first months of life?

4.10 How do infants' senses of hearing, smell, taste, touch, and motion compare to those of older children and adults?

4.11 How do researchers study perceptual development?

4.12 How do depth perception and patterns of looking change over the first years?

4.13 How do infants perceive human speech, recognize voices, and recognize sound patterns other than speech?

4.14 What is intermodal perception?

4.15 What arguments do nativists and empiricists offer in support of their theories of perceptual development?

**KEY TERMS**

- adaptive reflexes
- auditory acuity
- colic
- dishabituation
- dynamic systems theory
- empiricists
- habituation
- infant mortality
- intermodal perception
- myelinization
- nativists
- preference technique
- primitive reflexes
- pruning
- reticular formation
- sudden infant death syndrome
- synaptogenesis
- synapses
- tracking
- visual acuity
- viability
- vi-bration
- zygote

**Ch. 5**

**STUDY GUIDE QUESTIONS**

After completing Chapter 5, students should be able to answer the following questions:

5.1 What are the milestones of Piaget's sensorimotor stage?

5.2 How have other theorists challenged Piaget's explanation of infant cognitive development?

5.3 What does research tell us about infants' understanding of objects?
5.4 What kinds of learning are infants capable of?
5.5 How does categorical understanding change over the first years?
5.6 How does memory function in the first years?
5.7 What are the behaviorist, nativist, and interactionist explanations of language development?
5.8 What are some environmental influences on language development?
5.9 How do infants’ sounds, gestures, and understanding of words change in the early months of life?
5.10 What are the characteristics of toddlers’ first words?
5.11 What kinds of sentences do children produce between 1 and months of age?

5.1 How kinds of individual differences are evident in language development?
5.1 How does language development vary across cultures?
5.1 How is intelligence measured in infancy?

LEARNING OBJECTIVES
After completing Chapter 6, students should be able to answer the following questions:
6.1 How do Freud’s and Erikson’s views of personality development in the first years differ?
6.2 What are the main ideas of attachment theory?
6.3 How does synchrony affect parent-infant relations?
6.4 What are the four phases of attachment and the behaviors associated with them?
6.5 What are the four attachment patterns that Ainsworth discovered?
6.6 What variables might affect a parent’s ability to establish an attachment relationship with an infant?
6.7 What are the long-term consequences of attachment quality?
6.8 In what ways do patterns of attachment vary across cultures?
6.9 On which dimensions of temperament do most developmentalists agree?
6.10 What are the roles of heredity, neurological processes, and environment in the formation of temperament?
6.11 How do the subjective self, the objective self, and the emotional self development during the first years?
6.12 Why is it difficult to study the effects of nonparental care on development?
6.13 What might be the effects of nonparental care on physical and cognitive development?
6.14 What does research suggest about the risks of nonparental care with respect to social development?
6.15 What variables should be taken into account in interpretations of research on nonparental care?

KEY TERMS
- A-not-B error
- babbling
- Bayley Scales of Infant Development
- cooing
- deferred imitation
- expressive language
- holophrases
- infant-directed speech (IDS)
- inflections
- intelligence
- interactionists
- language acquisition device (LAD)
- means–end behavior
- naming explosion
- object concept
- object permanence
- primary circular reaction
- receptive language
- schematic learning
- secondary circular reaction
- sensorimotor stage
- telegraphic speech
- tertiary circular reaction
- violation-of-expectations method

Ch. 6

The syllabus and schedule are subject to change.
insecure/disorganized attachment
niche picking
objective (categorical self)
synchrony
temperament

Ch. 7

STUDY GUIDE QUESTIONS
After completing Chapter 7, students should be able to answer the following questions:
7.1 What are the major milestones of growth and motor development between and ?
7.2 What important changes happen in the brain during these years?
7.3 What are the nutritional and health-care needs of young children?
7.4 What factors contribute to abuse and neglect, and how do these traumas affect children’s development?
7.5 What are the characteristics of children’s thought during Piaget’s preoperational stage?
7.6 How has recent research challenged Piaget’s view of this period?
7.7 What is a theory of mind, and how does it develop?
7.8 How do information-processing and sociocultural theorists explain changes in young children’s thinking?
7.9 How does fast-mapping help children learn new words?
7.10 What happens during the grammar explosion?
7.11 What is phonological awareness, and why is it important?
7.12 What are the strengths and weaknesses of IQ tests?
7.13 What kinds of evidence support the nature and nurture explanations for individual differences in IQ?
7.14 What theories and evidence have been offered in support of genetic and cultural explanations of group differences in IQ scores?

KEY TERMS

centration
conservation
corpus callosum
egocentrism
false belief principle
fast-mapping
grammar explosion
handedness
hippocampus
intelligence quotient (IQ
invented spelling

Ch. 8

LEARNING OBJECTIVES
After completing Chapter , students should be able to answer the following questions:
8.1 What major themes of development did the psychoanalytic theorists propose for the early childhood period?
8.2 What are the findings of social-cognitive theorists with respect to young children’s understanding of the social world?
8.3 How does temperament change in early childhood?
8.4 What changes take place in the young child’s categorical, emotional, and social selves during the preschool years?
8.5 How do the major theoretical orientations explain gender development?
8.6 What are the characteristics of young children’s sex-role knowledge?
8.7 How is the behavior of young children sex-typed?
8.8 How does attachment change during the early childhood years?
8.9 How do parenting styles affect children’s development?
8.10 How are ethnicity and socioeconomic status related to parenting style?
8.11 How is family structure related to children’s development?

The syllabus and schedule are subject to change.
8.12 How does divorce affect children’s behavior in early childhood and in later years?
8.13 What are some possible reasons for the relationship between family structure and development?
8.14 What are the various kinds of play that are exhibited by preschoolers?
8.15 What types of aggression do children display during early childhood?
8.16 How do prosocial behavior and friendship patterns change during early childhood?

**KEY TERMS**

<table>
<thead>
<tr>
<th>agression</th>
<th>hostile aggression</th>
</tr>
</thead>
<tbody>
<tr>
<td>authoritarian parenting style</td>
<td>inductive discipline</td>
</tr>
<tr>
<td>authoritative parenting style</td>
<td>instrumental aggression</td>

</tbody>
</table>

**Ch. 9**

**LEARNING OBJECTIVES**

After completing Chapter 9, students should be able to answer the following questions:

9.1 What kinds of physical changes occur during middle childhood?
9.2 In what ways does the brain change during these years?
9.3 What are the three most important health hazards for 1-year-olds?
9.4 How do vocabulary and other aspects of language change during middle childhood?
9.5 What cognitive advantages do children gain as they move through Piaget’s concrete operational stage?
9.6 What is horizontal decalage, and how does Siegler explain concrete operational thinking?
9.7 How do children’s information-processing skills improve during middle childhood?
9.8 What should be included in an effective literacy curriculum?
9.9 How do bilingual and ESL approaches to second-language instruction differ?
9.10 Why do schools administer achievement tests, and what kinds of items do they include?
9.11 What kinds of group differences in achievement have educational researchers found?
9.12 Why is the term learning disability controversial?
9.13 How does attention-deficit hyperactivity disorder affect a child’s development?

**KEY TERMS**

<table>
<thead>
<tr>
<th>achievement test</th>
<th>inclusive education</th>

</tr>
</tbody>
</table>

The syllabus and schedule are subject to change.
Ch. 10

LEARNING OBJECTIVES
After completing Chapter 10, students should be able to answer the following questions:

10.1 How did the psychoanalytic theorists characterize the middle childhood years?
10.2 What are the main ideas of the trait and social-cognitive theorists?
10.3 What are the features of the psychological self?
10.4 How does self-esteem develop?
10.5 How does children’s understanding of others change in middle childhood?
10.6 How do children in Piaget’s moral realism and moral relativism stages reason about right and wrong?
10.7 How does self-regulation affect school-aged children’s relationships with their parents?
10.8 What changes occur in children’s understanding of friendships during this period?
10.9 In what ways do boys and girls interact during the middle years?
10.10 What types of aggression are most common among school-aged children?
10.11 How do popular, rejected, and neglected children differ?
10.12 What factors contribute to resilience and vulnerability among poor children?
10.13 How do television, computers, and video games affect children’s development?

KEY TERMS
bullying ( )  reciprocal determinism ( )  self-regulation
conduct disorder ( )  relational aggression ( )  social comparisons ( )
moral realism stage ( )  retaliatory aggression ( )  social status ( )
moral relativism stage ( )  self-efficacy ( )  trait ( )
psychological self ( )  self-esteem ( )

Ch. 11

LEARNING OBJECTIVES
After completing Chapter 11, students should be able to answer the following questions:

11.1 How do the brains and other body systems of adolescents differ from those of younger children?
11.2 What are the major milestones of puberty?
11.3 What are the consequences of early, "on time," and late puberty for boys and girls?
11.4 What are the patterns of adolescent sexual behavior in the United States?
11.5 Which teenaged girls are most likely to get pregnant?
11.6 What are some causes that have been proposed to explain homosexuality?
11.7 How does sensation seeking affect risky behavior in adolescents?
11.8 What patterns of drug, alcohol, and tobacco use have been found among adolescents in the United States?
11.9 What are the characteristics and causes of eating disorders?
11.10 Which adolescents are at greatest risk of depression and suicide?
11.11 What are the characteristics of thought in Piaget’s formal operational stage?
11.12 What are some major research findings regarding the formal operational stage?
11.13 What kinds of advances in information-processing capabilities occur during adolescence?
11.14 How do changes in students’ goals contribute to the transition to secondary school?
11.15 What gender and ethnic differences in science and math achievement have researchers found?
11.16 What variables predict the likelihood of dropping out of high school?

KEY TERMS
ability goals ( )  pituitary gland ( )
adolescence ( )  prefrontal cortex (PFC ( )
anorexia nervosa ( )  primary sex characteristics ( )
bulimia nervosa ( )  puberty ( )
formal operational stage ( )  secondary sex characteristics ( )
hypothetico-deductive reasoning ( )  secular trend
imaginary audience ( )  systematic problem solving ( )
menarche ( )  task goals ( )
personal fable ( )  transgndered ( )
Ch. 1

LEARNING OBJECTIVES

After completing Chapter 1, students should be able to answer the following questions:

12.1 What happens during Erikson’s identity-versus-role-confusion stage?
12.2 How does Marcia explain identity development?
12.3 In what ways does self-understanding in adolescence differ from that in childhood?
12.4 How does self-esteem change across the teenage years?
12.5 What are the gender role concepts of adolescents?
12.6 How do minority, biracial, and immigrant teens develop a sense of ethnic identity?
12.7 What are the features of moral reasoning at each of Kohlberg’s stages?
12.8 What are some important causes and effects in the development of moral reasoning?
12.9 How has Kohlberg’s theory been criticized?
12.10 What are the moral reasoning abilities and other characteristics of delinquents?
12.11 What are the features of adolescents’ relationships with their parents?
12.12 What are the characteristics of adolescents’ friendships?
12.13 How do peer groups change over the teen years?
12.14 How does interest in romantic relationships emerge among heterosexual and homosexual teens?

KEY TERMS

clique 1 identity achievement
conventional morality 0 identity crisis
crowd 1 identity diffusion
cyberbullying 10 identity versus role confusion
delinquency 10 moratorium
ethnic identity 0 postconventional morality 0
foreclosure preconventional morality 0
gender role identity 01 role-taking 0
identity

Ch. 13

LEARNING OBJECTIVES

After completing Chapter 13, students should be able to answer the following questions:

13.1 What is the difference between primary and secondary aging?
13.2 What changes in the brain take place in early adulthood?
13.3 How do other body systems change during early adulthood?
13.4 What habits and personal factors are associated with good health?
13.5 What are some of the viral and bacterial STDs that afflict young adults?
13.6 What are the causes and effects of intimate partner abuse?
13.7 Which mental disorders occur most frequently in young adulthood?
13.8 What is the difference between physical and psychological substance dependence?
13.9 What types of postformal thought have developmentalists proposed?
13.10 How do the concepts of crystallized and fluid intelligence help to explain age-related changes in IQ scores?
13.11 What are some of the ways in which college attendance affects individual development?
13.12 What is the impact of gender, ethnicity, and disability on the college experience?

KEY TERMS

crystallized intelligence postformal thought 0
dialectical thought 1 postsecondary education
fluid intelligence primary aging (senescence)
immate partner abuse reflective judgment 1
limbic system relativism 0
locus of control 0 schizophrenia
maximum oxygen uptake (VO max secondary aging
pelvic inflammatory disease 1 sexual violence
personality disorder substance abuse
phobia

The syllabus and schedule are subject to change.
Ch. 14

LEARNING OBJECTIVES

After completing Chapter 14, students should be able to answer the following questions:
14.1 What did Erikson mean when he described early adulthood as a crisis of intimacy versus isolation?
14.2 What is a life structure, and how does it change?
14.3 What are the characteristics of emerging adulthood?
14.4 What factors do evolutionary and social role theorists emphasize in their theories of mate selection?
14.5 How do marriage and divorce affect the lives of young children?
14.6 What factors contribute to the relationship between premarital cohabitation and divorce?
14.7 In what ways are gay and lesbian couples similar to and different from heterosexual couples?
14.8 How do singles accomplish Erikson’s psychosocial developmental task of intimacy?
14.9 What happens during the transition to parenthood?
14.10 How are family and friends important to young adults?
14.11 What factors influence an individual’s occupational choices?
14.12 How do career goals and job satisfaction change over time?
14.13 What are some of the innovations that are associated with the quality of work–life movement?
14.14 In what way do women’s work patterns differ from those of men?

KEY TERMS

assortative mating (homogamy)  kin-keeper
avoidant couples  life structure 1
career development  parental investment theory
emerging adulthood  quality of work–life (QWL movement
hostile/detached couples  social role theory
hostile/engaged couples  validating couples
intimacy 0  volatile couples
intimacy versus isolation 0  work–life balance

Ch. 15

LEARNING OBJECTIVES

After completing Chapter 15, students should be able to answer the following questions:
15.1 What do researchers know about brain function in middle age?
15.2 How does reproductive function change in men and women in middle age?
15.3 What is osteoporosis, and what factors are associated with it?
15.4 How do vision and hearing change in middle age?
15.5 How does cardiovascular disease develop?
15.6 What factors contribute to cancer?
15.7 What are some important differences in the health of middle-aged men and women?
15.8 How are socioeconomic status and ethnicity related to health in middle adulthood?
15.9 What are some of the consequences of alcoholism for middle-aged adults?
15.10 How do Denney’s and the Balteses’ models explain the relationship between health and cognitive functioning in middle age?
15.11 What has research revealed about the link between health and cognitive functioning?
15.12 How do young and middle-aged adults differ in performance on memory tests?
15.13 What does research suggest about age-related changes in creativity?

KEY TERMS

alcoholism  osteoporosis 1
atherosclerosis  perimenopausal phase
cardiovascular disease (CVD)  postmenopausal phase
climacteric  premenopausal phase
creativity 9  presbycusis
episodic memories 9  presbyopia
hypertension  selective optimization with compensation 90
### Ch. 16  
**LEARNING OBJECTIVES**

After completing Chapter 16, students should be able to answer the following questions:

1. How do the views of Erikson and Vaillant differ with regard to generativity?
2. How do proponents of the midlife crisis and the life events perspective approach middle age differently?
3. What contributes to the “mellowing” of partnerships in middle adulthood?
4. How do multigenerational caregiving and caregiver burden affect middle-aged adults’ lives?
5. How does the grandparent role affect middle-aged adults?
6. How do social networks change during middle adulthood?
7. What is the evidence for continuity and change in personality throughout adulthood?
8. What factors influence work satisfaction in middle adulthood?
9. What strategies do middle-aged workers use to maintain job performance at a satisfactory level?
10. What factors contribute to career transitions in midlife?
11. How do Baby Boomers differ from previous cohorts with respect to preparation for retirement?

**KEY TERMS**

- burnout
- caregiver burden
- companionate relationships
- generativity
- involved relationships
- life events approach
- multigenerational caregivers
- remote relationships
- role conflict

### Ch. 17  
**LEARNING OBJECTIVES**

After completing Chapter 17, students should be able to answer the following questions:

1. What factors contribute to life expectancy and longevity?
2. What variables contribute to individual differences in health among older adults?
3. How does the brain change in late adulthood?
4. What types of sensory changes occur in late adulthood?
5. How do theories explain biological aging?
6. What are the behavioral effects of changes in the various body systems of older adults?
7. What is Alzheimer’s disease, and how does it differ from other dementias?
8. What does research suggest about depression among older adults?
9. What kinds of memory differences distinguish older and younger adults?
10. What do theory and research on wisdom and creativity reveal about cognitive functioning in late adulthood?

**KEY TERMS**

- activities of daily living (ADLs)
- Alzheimer’s disease
- cross-linking
- dementia
- frail elderly
- free radicals
- gerontology
- instrumental activities of daily living (IADLs)
- programmed senescence theory
- satiety
- synaptic plasticity
- telomere
- terminal decline hypothesis
- tinnitus
- vascular dementia
- wisdom

### Ch. 18  
**LEARNING OBJECTIVES**

After completing Chapter 18, students should be able to answer the following questions:

1. What does research say about Erikson’s stage of ego integrity versus despair?
2. What are the main ideas of activity, disengagement, and continuity theory?
3. How is successful aging manifested in the lives of older adults?

*The syllabus and schedule are subject to change.*
18.4 How does religious coping influence physical and mental health in late adulthood?
18.5 What are the living arrangements of most elderly people in the United States and in other industrialized countries?
18.6 How do intimate partnerships contribute to development in late adulthood?
18.7 What is the significance of family relationships and friendships for older adults?
18.8 What are some gender and ethnic differences in older adults’ social networks?
18.9 What factors contribute to the decision to retire?
18.10 How does retirement affect the lives of older adults?

KEY TERMS
- activity theory
- institutional migration
- aging in place
- life review
- amenity move
- religious coping
- compensatory (kinship migration)
- reminiscence
- continuity theory
- successful aging
- disengagement theory
- volunteerism
- ego integrity

Ch. 19

LEARNING OBJECTIVES
After completing Chapter 19, students should be able to answer the following questions:
19.1 What are the characteristics of clinical death, brain death, and social death?
19.2 How do hospice and hospital care differ with respect to their effects on terminally ill patients?
19.3 What are the characteristics of children’s and adolescents’ ideas about death?
19.4 How do young, middle-aged, and older adults think about death?
19.5 What factors are related to fear of death in adults?
19.6 How do adults prepare for death?
19.7 How did Kübler-Ross explain the process of death?
19.8 What are some other views of the process of dying?
19.9 How do people vary in the ways they adapt to impending death?
19.10 How does Freud’s psychoanalytic theory view grief?
19.11 What are the theories of Bowlby and Sanders regarding grief?
19.12 What theories of grief have been proposed by critics of psychoanalytic and attachment theories?
19.13 How do funerals and ceremonies help survivors cope with grief?
19.14 What factors influence the grieving process?
19.15 How does grief affect the physical and mental health of widows and widowers?

KEY TERMS
- brain death
- grieving
- social death
- clinical death
- hospice care
- thanatology
- complicated grief
- palliative care
- unique invulnerability
