

Navarro Partnership

Computer Science & Information Systems Program *Available for Transfer Students*

Our Department of Computer Science and Information Systems has a history of excellence in computer science and information systems research and education. Established in 1971 on our main campus in Commerce, Texas—AND NOW AT OUR NAVARRO PARTNERSHIP IN CORSICANA—we offer specialized undergraduate programs with a focus on all

your career needs in the diverse computer science, computing, and information technology fields. Industry today is looking for graduates with deeper skill sets. Our advanced coursework focuses on networking, database management, programming, and information assurance and security.

Web-enhanced *(part on-line and part in the classroom)*

- **Bachelor of Science in Computer Science (B.S)**
Prepares you for a wide variety of applications found within the diverse computer science field. You will acquire a strong computer science foundation normally required for careers involving computer science engineering.
- **Bachelor of Science in Computer Information Systems (B.S.C.I.S)**
Prepares you for a wide variety of applications found within the computing and information technology field. You will acquire a strong foundation in programming and database technology normally required for careers in the business environment.
