

We are excited that you are interested in the Navarro Partnership. You're the reason we're passionate about teaching and your accomplishments—academic, personal, and professional—become the successes of the entire community!

Mathematics Graduate Program

Web-enhanced (*part on-line and part in the classroom*)

The job market for mathematicians and related pursuits is on the rise. Tuition is very affordable, and we have a strong faculty. The MASTER OF SCIENCE program in MATHEMATICS prepares you for careers in industry, government,

business, scientific and technological fields, computing and information science, actuarial work and education. Studying special topics under faculty supervision can lead to computer experimentation using sophisticated software, presenting research at regional and statewide meetings and colloquiums attended by actuaries, mathematicians, operation research analysts, statisticians and educators. We care about students and are committed to excellence in teaching. We devote ourselves to finding out the best practices to improve student learning and to contribute to the advancement of mathematics.
