Connecting to University Resources Off Campus

1. Go to the following link: [https://vpn.tamucc.edu](https://vpn.tamucc.edu)
2. On the following login page select “faculty/staff” as the group, enter your username and password for your e-mail account/login to university computers.
3. Click Continue on the next screen.
4. Follow the on screen directions.
5. Once you have gotten the following screen you can logout.

6. Then go to Start → Programs → Cisco → Cisco Anyconnect VPN Client → Cisco Anyconnect VPN Client
7. In the “connect to” field it should say vpn.tamucc.edu. If it does not, type it in, then select faculty/staff as the group. Enter your username and password for your e-mail/university computer.
8. Click Connect.
9. Click Accept.
10. Once you have successfully connected the box should disappear and should move to your system tray. You will see the following icon when the vpn client is connected.
11. Keep in mind that you must follow steps 6-9 every time you would like to use university resources from offsite.

FAQs

1. I am still having problems connecting, what now? Verify that you are getting the correct IP address under Cisco AnyConnect VPN Virtual Miniport Adapter for Windows it should have the following IP address 10.16.X.XX, where X is variable. If you need assistance figuring out your IP address please contact our office at 903-468-6000 or helpdesk@tamuc.edu for assistance. If you are still having problems, make sure you do not have any anti-virus, firewall programs, etc. that may interfere with your ability to connect to university resources.
