Concurrent Enrollment: MUS 2116 (Ear Training III)

Required Materials: The Musician's Guide to Theory and Analysis (3rd Edition) Clendinning/Marvin – **BOTH textbook and Online Access Code (combined paper workbook and textbook packets sold at bookstore) Staff Paper & Pencils!!!!**

Course Description: Theory III is the third in a four-semester sequence which examines the notational, harmonic, and compositional practices of the Western art-music tradition. This course emphasizes the development of analytical and compositional skills, with particular focus on the music of the Common Practice Era (CPE), specifically music of the Romantic era.

Student Learning Outcomes:

Upon successful completion of this course, students will be able to accomplish the following in each category:

Chromatic Principles

- Construct and identify secondary dominant chords, leading tone chords.
- Diatonic Modulation to closely related keys
- Binary Form, Ternary Form, Fugue and Invention
- Modal Mixture
- Neapolitan Sixth Chords and Augmented Sixth Chords
- Chromatic Voice-Leading, Chromatic Modulation
- Sonata Form, Rondo Form, Fugue, Sonatina, Vocal and Popular Forms
- Demonstrate, through composition and analysis, an understanding of chromatic harmony and form.
- Demonstrate, through composition and analysis, an understanding of common-practice functional harmony and form.

Composition

- Compose original works in a chorale style, and simple keyboard style

Course Requirements: There will be frequent homework assignments utilizing both analytical and compositional skills. **All** work should be done with either pencil or computer notation software. Homework is to be turned in during class on the day on which it is due. **Late assignments will not be accepted for credit unless by previous arrangement with the instructor.**

Often it may be helpful for students to work on homework assignments with a partner, or in groups. When done correctly, this can serve as a proven method for success for students who may be struggling with a particular concept in class. *However, take care that the completed assignment reflects your own understanding of the material, and is not merely a copy of a classmate or colleague's work.* Doing so will help to ensure that your work efforts in the class are both fruitful (reflecting the very purpose of homework) and intellectually honest.

Three examinations will be given during the semester. Specific information as to exam content will be provided at least a week before the exam is administered. In addition, there will be frequent quizzes of varying scope and length, both announced **and unannounced**.

The Final Project for this course will consist of a short, original composition for solo piano. The composition will make use of the periodic phrase structure discussed in class in addition to the standard harmonic and voice-leading practices of the CPE. Additional information regarding length and specific content will be provided during the semester.

Assessment:	Exams:	35% (Exams I & II – 10% each, Exam III – 15%)
	Homework:	25%
	Quizzes:	20%
	Projects:	10%
	Class Participation:	10%

A = 90-100	C = 70-79	F = 0-59
B = 80-99	D = 60-69	

Attendance Policy: The University Catalog states, "Students are expected to be present for all class meetings of any course for which they are enrolled." Sporadic attendance is a waste of your intellectual and financial resources. Unless they are the result of a medical or family emergency, excused absences (as defined by the Catalog) need to be arranged beforehand with the instructor. Each student is allowed up to three unexcused absences over the course of the semester. Additional unexcused absences may result in the lowering of the final grade and, in rare and extreme cases, the student being dropped from the course.

Cell Phone/Laptop Policy: During class all cell phones should be turned off or silenced. Reading and/or responding to text messages or tweets, is both rude and distracting to both your instructor and your classmates. Repeated use of

cell phones in class will result in a reduction in the student's Class Participation grade. Unless there's an obvious reason to be using one, laptops are not needed during class time and should not be used.

Note Bene: The study of music theory is an essential and important component of the developing musician's education. Far from being just another "required course," music theory forms the foundation of nearly all higher-ed courses in music, which is a reason for its placement at the very start of undergraduate music studies. Theory is also a subject where the concepts are presented sequentially, each leading to the next. As such, it is imperative that the student be proactive if they are having issues with a particular topic. Do not wait in frustration; ask a question in class, seek me out before or after class, or e-mail me to set up a time to meet individually.
