Best Practices

1. Chrome is the recommended browser. Firefox works okay, but not for any screen sharing.
2. You will need to download the Chrome extension for YouSeeU to be able to share your screen in YouSeeU.
3. Instead of loading PowerPoints, use presentations converted PDFs instead.
4. When using a touch screen, instead of annotating on the built in white board in YouSeeU:
   a. Use an external app like Microsoft Paint or Word
   b. Annotate in the app
   c. Use YouSeeU *screen share* and it will display the app with annotations.
5. YouSeeU does not support external devices such as tablets, touchscreen, and other types of devices that are used for annotating on the whiteboard.
6. Be sure you are using a wired in Ethernet connection to ensure the best quality and stability for your sessions.
